

Assign Transshipment Locations and Generate Transportation Proposals

Explanation	Screenshot
1. Choose <i>Assign Transshipment Locations</i> to review the assignment of transshipment locations to transportation zones.	
2. Choose <i>Display Assignments</i> to review the assignments that exist in the system.	
3. There are two assignments. The transshipment location TMCD-HANNOVER covers the transportation zone DE-NRW , while the transshipment location TMCD-FRANKFURT covers TMAT_ZONE00 . To navigate back to your homepage, choose the <i>SAP logo</i> .	

Explanation	Screenshot
4. Choose <i>Planning</i> to proceed.	 The screenshot shows the SAP Home dashboard. The top navigation bar includes 'Home', 'Order Management', 'Logistics Integration', 'Planning', 'Settlement', 'Contract Management', 'Charge Management', 'TM Master Data', 'Profiles and Settings', 'Sales Documents', and 'Shipping'. The 'Planning' tab is highlighted with a yellow box and a yellow circle containing the number '4'. Below the navigation bar, there are several tiles for 'Freight Orders', 'Freight Bookings', 'Create Road Freight Order', 'Edit Road Freight Order', 'Freight Order Execution Monitoring', and 'Freight Order Quantity Analysis'. There are also tiles for 'Forwarding Orders', 'Create Forwarding Order', and 'Edit Forwarding Order'.
5. To start planning, open the <i>Transportation Cockpit</i> app.	 The screenshot shows the SAP Home dashboard. The top navigation bar is the same as in the previous screenshot. The 'Planning' tab is still highlighted. In the main content area, there are several tiles: 'Freight Units', 'Edit Freight Unit', 'Transportation Cockpit', 'Container Units', 'Trailer Units', and 'Package Units'. The 'Transportation Cockpit' tile is highlighted with a yellow box and a yellow circle containing the number '5'.
6. To load your selection criteria for planning, choose the saved search <i>PLAN_00</i> .	 The screenshot shows the SAP Transportation Cockpit 'Selection Criteria' screen. The top navigation bar includes 'Home', 'Order Management', 'Logistics Integration', 'Planning', 'Settlement', 'Contract Management', 'Charge Management', 'TM Master Data', 'Profiles and Settings', 'Sales Documents', and 'Shipping'. The 'Planning' tab is highlighted. The main content area shows a 'Saved Searches' dropdown menu with 'PLAN_00' selected. Below the dropdown, there are several sections for selection criteria: 'Freight Unit Stages', 'Consignment Orders', 'Freight Bookings', 'Vehicle Types', 'Container Resources', 'Transportation Units', 'Freight Orders', 'Vehicle Resources', 'Drivers', and 'Container Types'. Each section contains a table with columns for 'Source Location', 'Destination Location', 'Value', and 'Unit'. The 'PLAN_00' search is highlighted with a yellow box and a yellow circle containing the number '6'.

Explanation	Screenshot
7. The selection criteria a pre-filled based on your Saved Search. To enter the transportation cockpit, choose <i>Continue</i>.	
8. Choose the radio-button for freight unit 5116 to proceed.	
9. Choose <i>Transportation Proposal</i> to create transportation proposals for freight unit 5116.	

Explanation	Screenshot
10. Choose <i>Expand all</i> to expand the two different transportation proposals.	
11. Two transportation proposals have been created. The first proposal is a direct connection between shipping point SP_1010 and destination location TMAT00-01. The second proposal consists of two stages. The first stage is from the shipping point SP_1010 to transshipment location TMCD-FRANKFURT and the second stage continues from the transshipment location TMCD-FRANKFURT to destination location TMAT00-01. Both proposals can be executed either by carrier TM-CAR-10 and TM-CAR-11, with the first one being the
