

Define Saved Searches and Views in the Transportation Cockpit

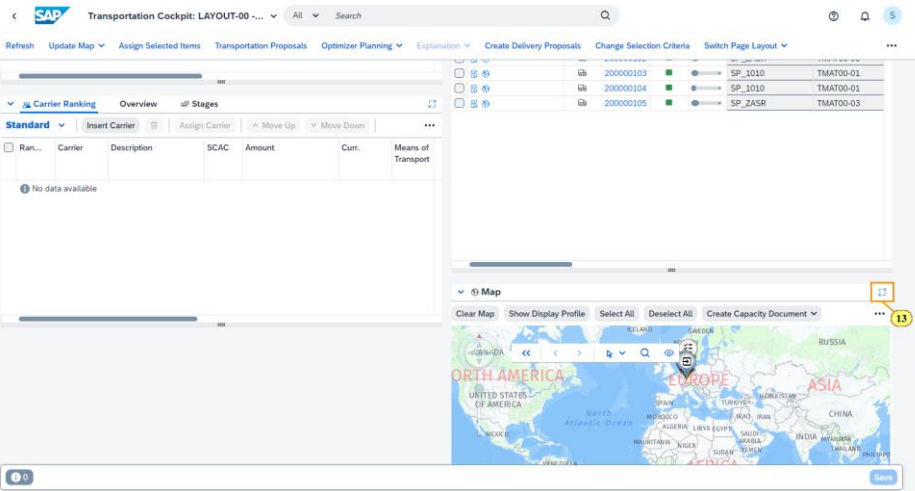

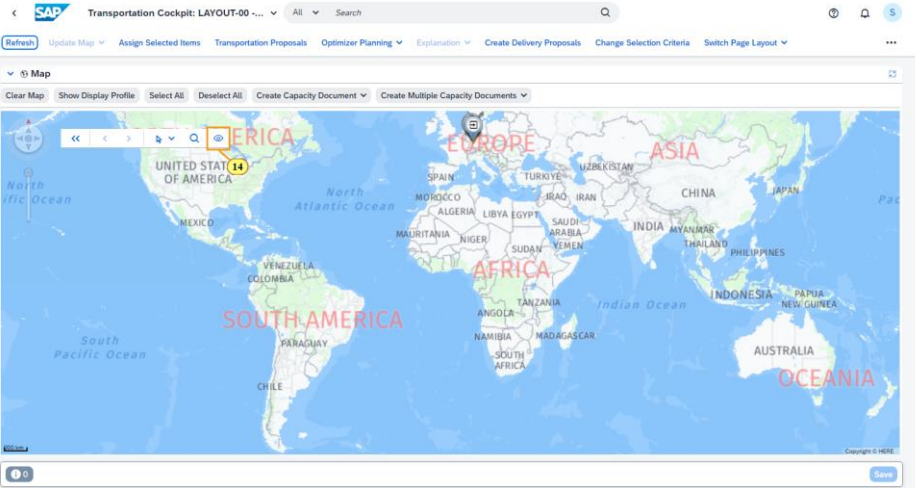

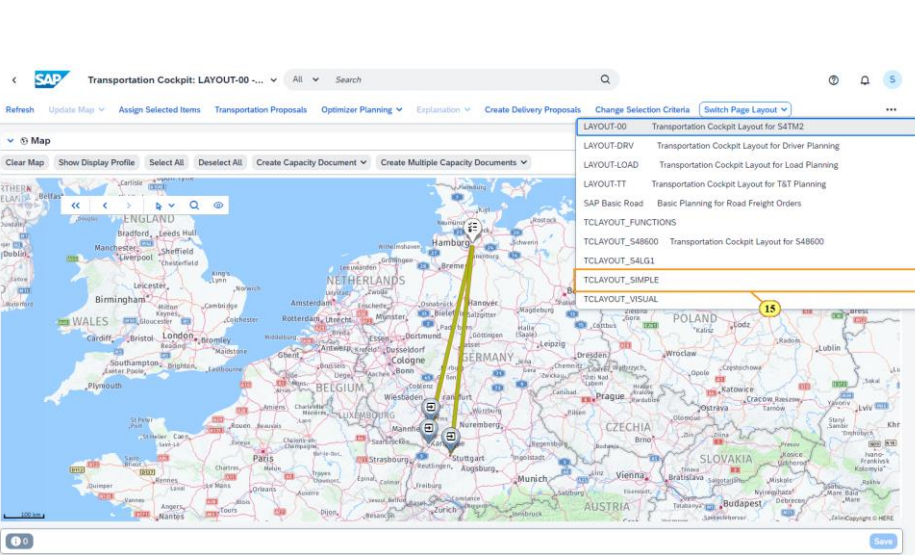

Explanation	Screenshot
1. To start planning, open the <i>Transportation Cockpit</i> app.	
2. To load your selection criteria for planning, choose the saved search <i>PLAN_00</i> .	
3. Review your selection of freight unit stages, vehicle types, and freight orders. Choose in the area below the scroll bar to scroll down.	

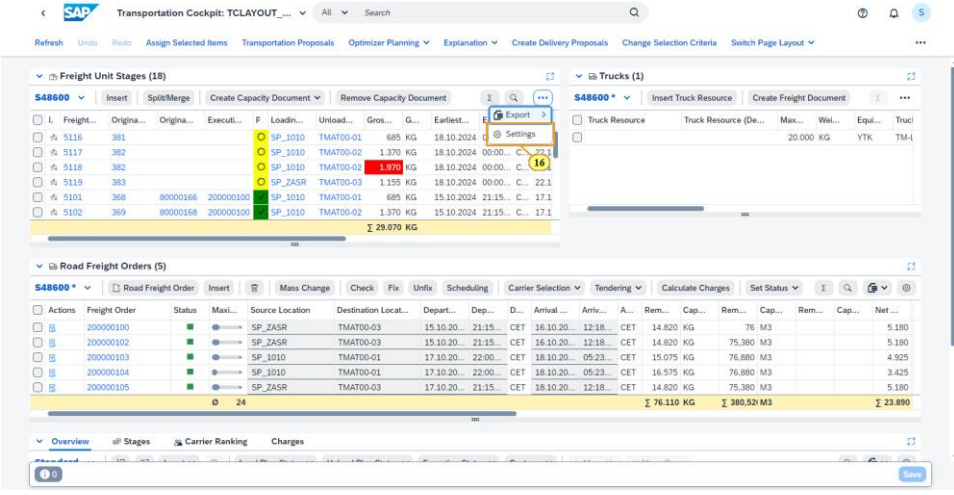

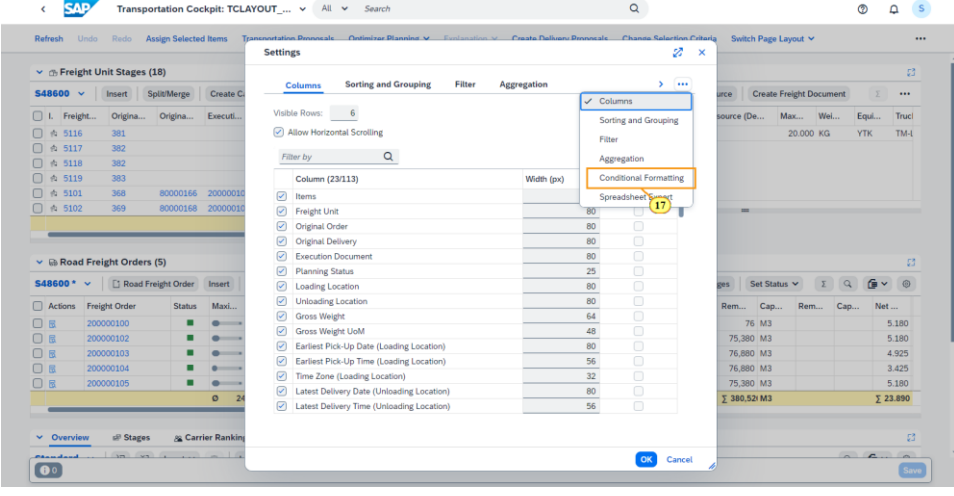

Explanation	Screenshot
You can save your searches privately or globally to share them with other users.	
You can choose to enter the transportation cockpit using profile and layout sets or selection criteria. Choose <i>Next</i> to continue.	
4. To enter the transportation cockpit with the selection criteria checked before, choose <i>Continue</i>.	

Explanation	Screenshot
5. The information displayed in the transportation cockpit varies based on the page layout. In this layout, you can view freight unit stages and trucks at the top of the screen, road freight orders in the middle, and detailed information about those road freight orders at the bottom. Choose in the area below the scroll bar to scroll down.	The screenshot displays the SAP Transportation Cockpit interface. At the top, there are sections for 'Freight Unit Stages (18)' and 'Trucks (1)'. Below these, the 'Road Freight Orders (5)' section is visible. The interface includes various tabs like 'Overview', 'Stages', 'Carrier Ranking', and 'Charges'. A scroll bar is present on the right side of the main content area.
6. You can change the page layout dynamically. That way, you can always display the information in a way that allows you to plan efficiently. To open a dropdown list of available page layouts, choose <i>Switch Page Layout</i>.	This screenshot shows the same SAP Transportation Cockpit interface, but with the 'Switch Page Layout' dropdown menu open. The dropdown menu is located in the top right corner of the interface, and it lists several available page layouts. The 'Switch Page Layout' option is highlighted, and a yellow circle is drawn around it to indicate where to click.

Explanation	Screenshot
7. To switch to a different page layout, choose the entry <code>TCLAYOUT_VISUAL</code> .	
8. In this page layout, a Gantt chart visually displays objects such as freight units, orders, and trucks. This lets you easily see when a freight unit needs to be scheduled and when a vehicle resource is available. To enlarge the Gantt chart view, select the <i>Full Screen Mode</i> .	
9. You can select different objects in the upper and lower parts of the Gantt chart. In this example, you show freight orders in the upper part of the screen and vehicle resources in the lower part of the screen. To return to the initial page layout, choose	

Explanation	Screenshot
Minimize.	
10. To review the planning data in a different page layout, choose <i>LAYOUT-00</i> .	
11. Four unplanned freight units have already been selected for your convenience. Choose <i>Add Selected Entries</i> from the Update Map dropdown menu to display the four freight units on the map.	
12. Choose in the area below the scroll bar to scroll down.	

Explanation	Screenshot
13. To proceed, choose the <i>Full Screen Mode</i>.	
14. To focus the map on the selected entries, choose <i>Focus</i>.	
15. On the map, you can display all objects (freight units, freight orders, vehicle resources, ...). You can display them as arrows or icons. You can plan on the map using drag and drop, and the context menu is available when you right-click on any object. To change the view back to the tabular layout, choose	

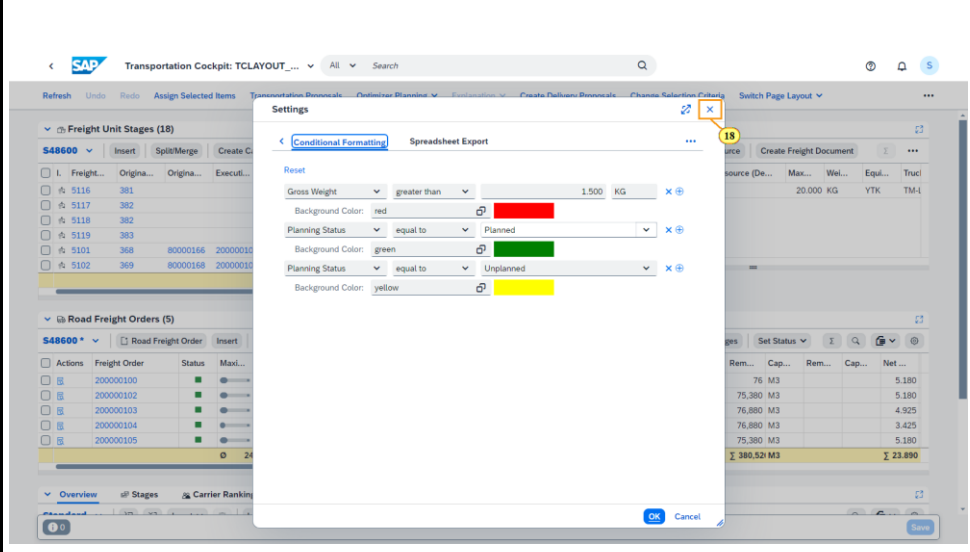

Explanation	Screenshot
<i>TCLAYOUT_SIMPLE</i>	
16. You can customize each screen area according to your needs using the settings function. Choose <i>Settings</i> to proceed.	 The screenshot shows the SAP Transportation Cockpit interface. The top navigation bar includes 'Refresh', 'Undo', 'Redo', 'Assign Selected Items', 'Transportation Proposals', 'Optimizer Planning', 'Explanation', 'Create Delivery Proposals', 'Change Selection Criteria', and 'Switch Page Layout'. The main content area is divided into three sections: 'Freight Unit Stages (18)', 'Trucks (1)', and 'Road Freight Orders (5)'. In the 'Freight Unit Stages' section, a table lists various freight units with columns for 'L', 'Freight...', 'Origina...', 'Origina...', 'Execut...', 'F', 'Loadin...', 'Unload...', 'Gros...', 'G...', 'Earliest...', and 'C...'. A red box highlights the 'Settings' button in the top right corner of this table. The 'Trucks' section shows a table with columns for 'Truck Resource', 'Truck Resource (De...', 'Max...', 'Wel...', 'Equi...', and 'Truc...'. The 'Road Freight Orders' section shows a table with columns for 'Actions', 'Freight Order', 'Status', 'Max...', 'Source Location', 'Destination Locat...', 'Depart...', 'Dep...', 'D...', 'Arrival...', 'Arriv...', 'A...', 'Rem...', 'Cap...', 'Rem...', 'Cap...', and 'Net...'. A red box highlights the 'Settings' button in the top right corner of this table.
17. You can define which information (columns) should be available in the screen area. In addition, sorting and grouping criteria, filters, or aggregation criteria can be applied. One highlight of this functionality is the conditional formatting option. Choose <i>Conditional Formatting</i> to proceed.	 The screenshot shows the SAP Transportation Cockpit interface with the 'Settings' dialog box open. The dialog box has four tabs: 'Columns', 'Sorting and Grouping', 'Filter', and 'Aggregation'. The 'Columns' tab is selected, and a list of columns is shown with checkboxes for each. The 'Conditional Formatting' option is highlighted in the list. The background shows the same tables as the previous screenshot, but they are partially obscured by the dialog box.

Explanation

18. In this example, conditional formatting indicates freight units with a gross weight larger than 1500 kg in red. Planned freight units will be shown in green, while unplanned freight units will be shown in yellow.

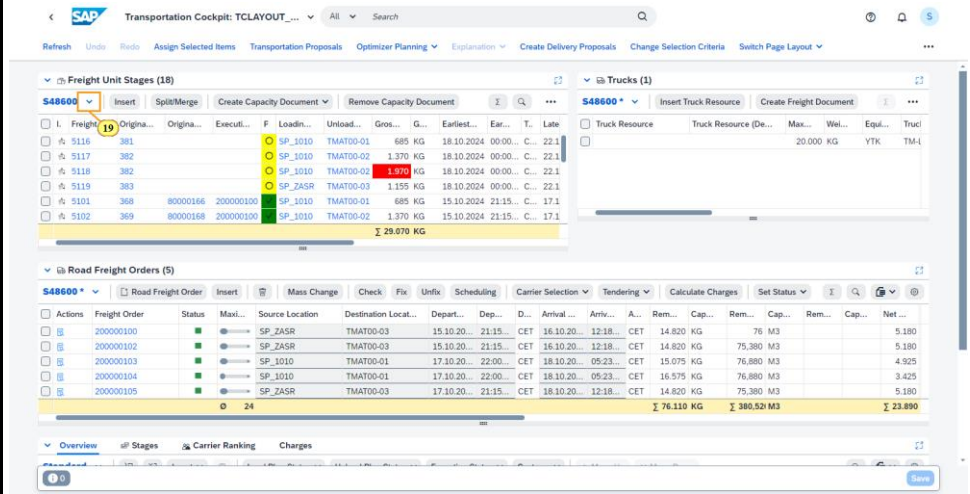

To proceed, choose *Close*.

Screenshot

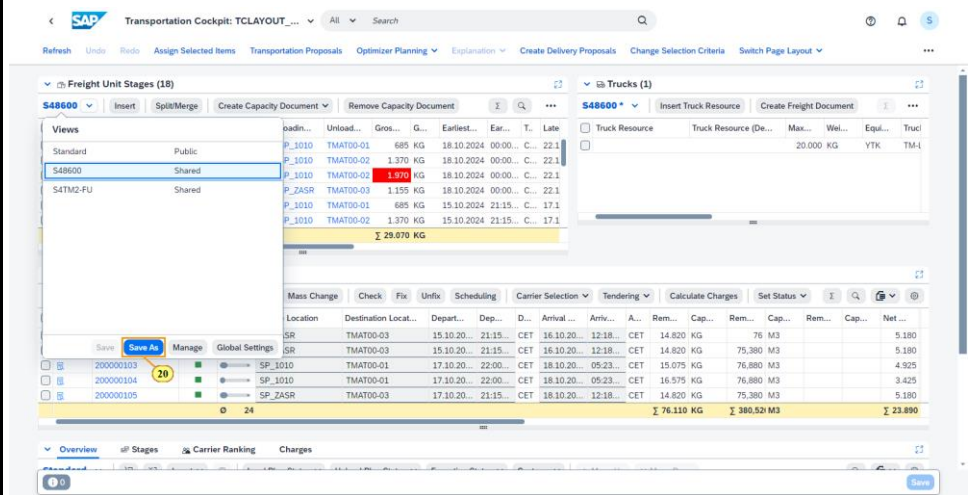

19. You can quickly identify the planning status and freight unit weight based on the color coding applied.

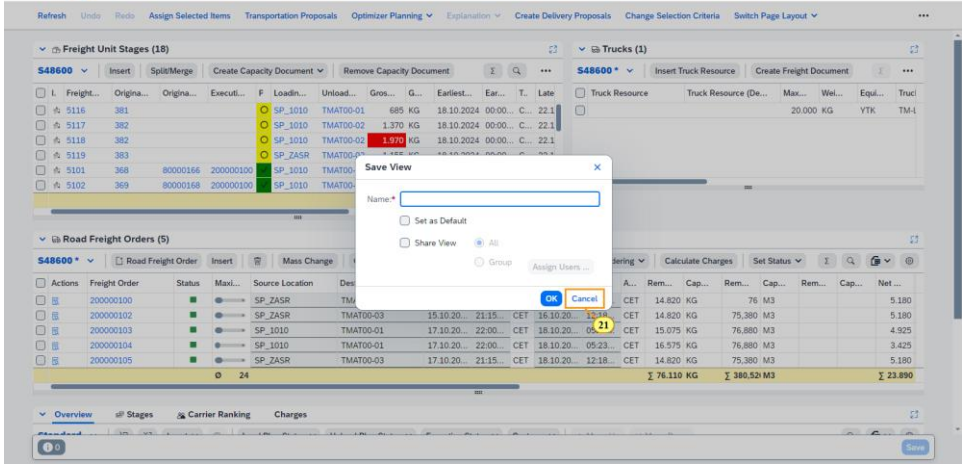

To save this view for future use, choose the icon highlighted.

20. You can define different views.

To continue, choose *Save As*.

Explanation	Screenshot
21. You can save multiple views. You can also share your saved views with all or a specific group of users. You can also define one view as default. This view will then be shown whenever you enter the transportation cockpit. To leave this interface without applying any changes, choose <i>Cancel</i>.	
 Being back at the main screen of the transportation cockpit concludes this demonstration.
