| <p>9. With the geographical selection attributes, you can choose freight units by source location, source transportation zone, destination location, and/or destination transportation zone.</p> <p>To return to your homepage and explore additional selection options, choose the <i>SAP logo</i>.</p>                                                                              |  <p>The screenshot shows the SAP 'Edit Selection Profile' interface for profile 'SEL-54TM1'. The 'Geographical Selection Attributes' tab is active. Under 'General Data', the 'Geographical Sel. Attributes' are set to 'SEL-GEO-99' and the 'Description' is 'Selection (Geography) 54TM1'. The 'Both Locations' checkbox is unchecked. Below this, there are four tabs: 'Source Locations', 'Source Zones', 'Destination Locations', and 'Destination Zones'. The 'Source Locations' tab is selected and highlighted with a yellow box. It contains a table with columns: 'Sign', 'Option', 'Pattern', 'Lower Value', and 'Upper Value'. The 'Sign' column has checkboxes for 'Inclusive' and 'Exclusive'. The 'Option' column has a dropdown menu. The 'Pattern' column has a dropdown menu. The 'Lower Value' column has a dropdown menu with 'TMAT00*' selected. The 'Upper Value' column is empty. At the bottom right, there are 'Save', 'Cancel', and 'Delete' buttons.</p> |
| <p>10. Because the string <b>pls</b> was entered into the search bar, three apps are shown at the current result list.</p> <p>PLS Management is the abbreviation for Profile and Layout Set Management. It allows you to define which users should work with which selection profiles.</p> <p>To continue, choose the entry for <i>PLS Management for Transportation Cockpit</i>.</p> |  <p>The screenshot shows the SAP 'Home' page. The search bar at the top contains the text 'pls'. A dropdown menu is open, showing three search results: 'PLS Management for Carrier Selection', 'PLS Management for Delivery Creation', and 'PLS Management for Transportation Cockpit'. The third result, 'PLS Management for Transportation Cockpit', is highlighted with a yellow box and a yellow circle with the number '10' next to it. The background of the page shows various SAP tiles for 'Order Management', 'Logistics Integration', 'Planning', and 'Settlement'.</p>                                                                                                                                                                                                                                                                                                                                                                                               |

| Explanation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Screenshot                                                                                                                                                                                                                                                                                                                                                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>11. For planning in the transportation cockpit, you typically require three elements:</p> <ul style="list-style-type: none"> <li>• A selection profile selects the freight unit (stages) relevant to planning.</li> <li>• A Planning Profile defines how the planning process will be executed.</li> <li>• A page layout for the Transportation Cockpit to define how the information is presented to the user.</li> </ul> <p>In PLS Management, you can define which combination of selection profile, planning profile, and page layout is available to which user.</p> <p>Choose the radio button to assign users.</p> |  <p>The screenshot displays the 'Profile and Layout Set Management' interface in SAP. The main table lists various sets, including 'SEL-S4TM1'. A yellow callout bubble with the number '11' points to a radio button in the 'Users' column, indicating the step to assign users.</p> |

| Explanation                                                                                                                                                                                                                                                        | Screenshot                                                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <p>12. Here, you can add which user shall be assigned to the selected set. You can, for example, define the user who is typically responsible and his stand-in. You do not want to change the assignment.</p> <p>Therefore, to continue, choose <i>Cancel</i>.</p> |    |
| <p>13. Choose the <i>SAP</i> logo to navigate back to your homepage and explore additional selection options.</p>                                                                                                                                                  |   |
| <p>14. To proceed, choose the <i>Planning</i> tab.</p>                                                                                                                                                                                                             |  |

| Explanation                                                                                                                                                                                                                                                                                                                                                        | Screenshot                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| 15. Choose the <i>Transportation Cockpit</i> app to open the selection screen of the transportation cockpit.                                                                                                                                                                                                                                                       |   |
| 16. In the transportation cockpit, you have two different start screens based on how you want to select your data. Previously, you explored PLS Management, which allows you to plan based on profiles and layout sets. Now, we want to explore the second option: Selection Criteria.<br><br>To proceed, choose <i>Selection Criteria</i> from the dropdown menu. |  |

| Explanation                                                                                                                                                                                                                                                                                                                                                                                                                           | Screenshot                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| <p>17. On the selection criteria screen, you can select your planning data for all relevant objects (freight unit stages, vehicle types, freight orders, ...) according to pre-defined criteria (source location, destination location, vehicle type, ...). You can also save your selection and retrieve saved selection via the <b>Saved Searches</b> dropdown menu.</p> <p>To proceed, choose the saved search <i>PLAN_00</i>.</p> |    |
| <p> Upon selecting the saved search, the content of the selection becomes visible.</p> <p>In this example, freight unit stages are selected based on the destination location. Vehicle types are chosen based on the vehicle type, and freight orders are also selected based on the destination location.</p>                                     |  |

| Explanation                       | Screenshot |
|-----------------------------------|------------|
| This concludes the demonstration. |            |
