

Create and Post a Freight Settlement Document and Verify the Invoice

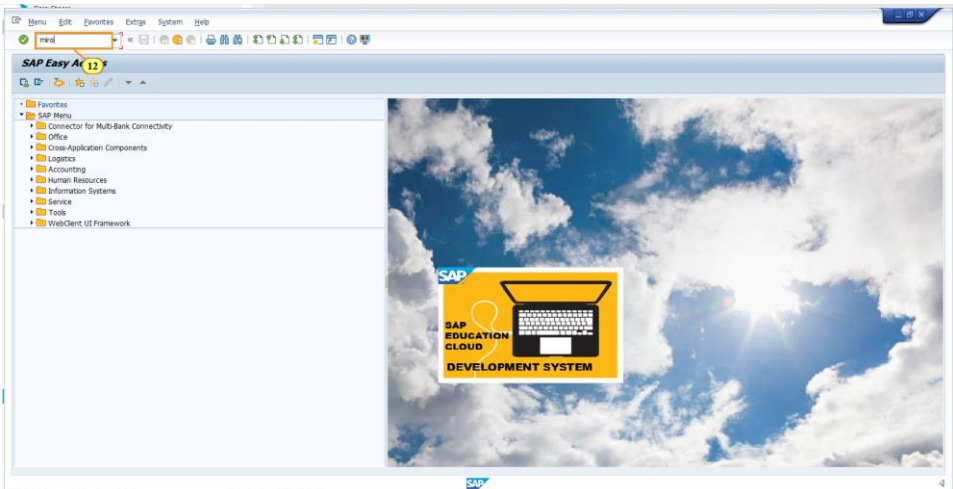

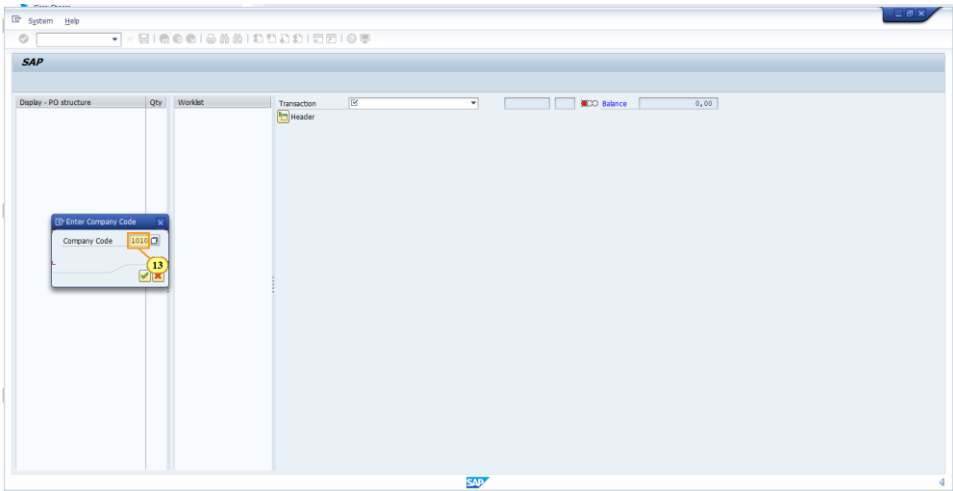

Explanation	Screenshot
1. Choose <i>Edit</i> to allow changes for the freight order 20000109.	 The screenshot shows the SAP 'Display Freight Order for S4TM1 200...' interface. The 'Edit' button in the top toolbar is highlighted with a red box and a yellow circle. The 'Charges' tab is active, displaying a table of charges with columns for Charge Hierarchy, Late Charge, Ca., M., Charge, Charge, Com., Co., Logistical, Rate, Rate, M., Ignore, R., Calculation, A., Rule, Pe., UoM, Q., Calculation Base, Calc., Ca., A., Cu., Line, Re., Li., Re., Final, and Doc. The table lists various charges like Basic Freight Charge, Fuel Surcharge, Handling Charge, and Waiting Time Surcharge.
2. Choose <i>Create Freight Settlement Document</i> from the dropdown menu to proceed.	 The screenshot shows the SAP 'Edit Freight Order for S4TM1 200000...' interface. The 'Create Freight Settlement Document' option is highlighted in the dropdown menu. The 'Charges' tab is active, displaying a table of charges with columns for Charge Hierarchy, Late Charge, Ca., M., Charge, Charge, Com., Co., Logistical, Rate, Rate, M., Ignore, R., Calculation, A., Rule, Pe., UoM, Q., Calculation Base, Calc., Ca., A., Cu., Line, Re., Li., Re., Final, and Doc. The table lists various charges like Basic Freight Charge, Fuel Surcharge, Handling Charge, and Waiting Time Surcharge.
3. The freight settlement document is initially created with a temporary order number (\$1). Choose <i>Save All</i> .	 The screenshot shows the SAP 'Create Freight Settlement S4TM1 \$1' interface. The 'Save All' button in the bottom right corner is highlighted with a red box and a yellow circle. The 'Settlement Documents' table is visible, showing a document with ID \$1 and category Freight Settlement Document. The 'Statuses' section shows the document is ready for accruals.

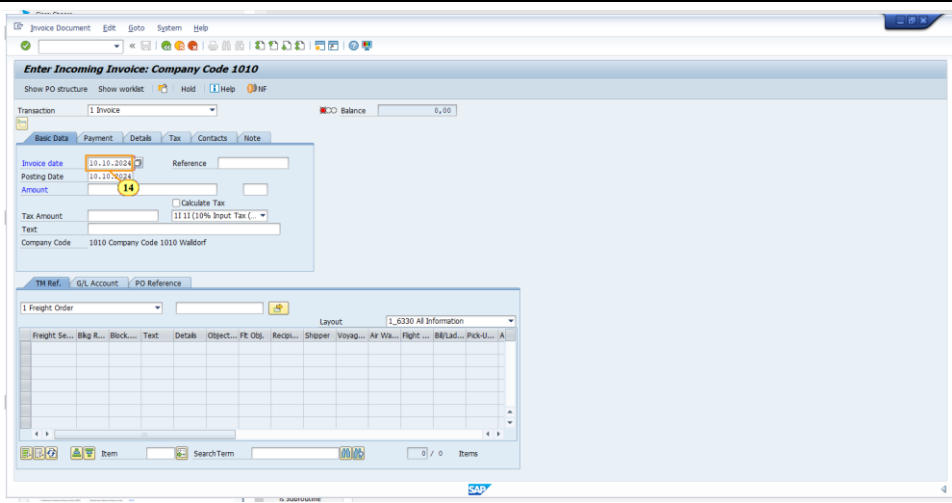

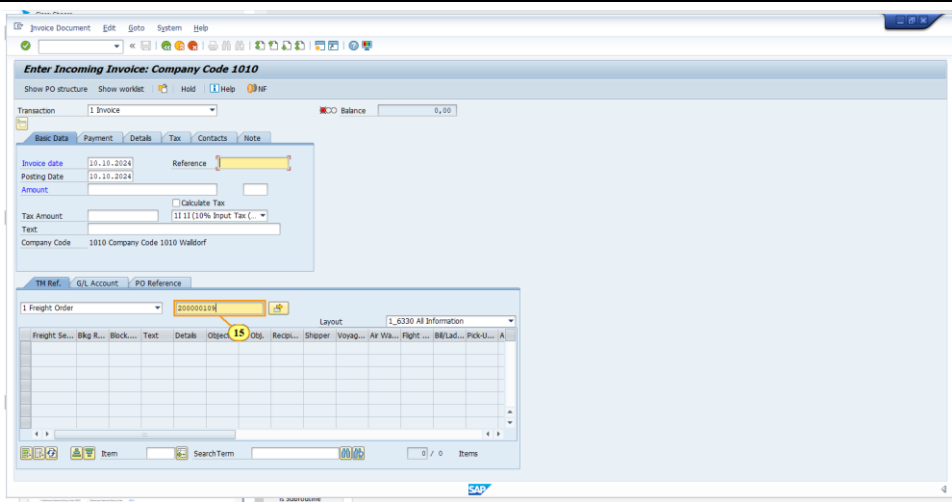

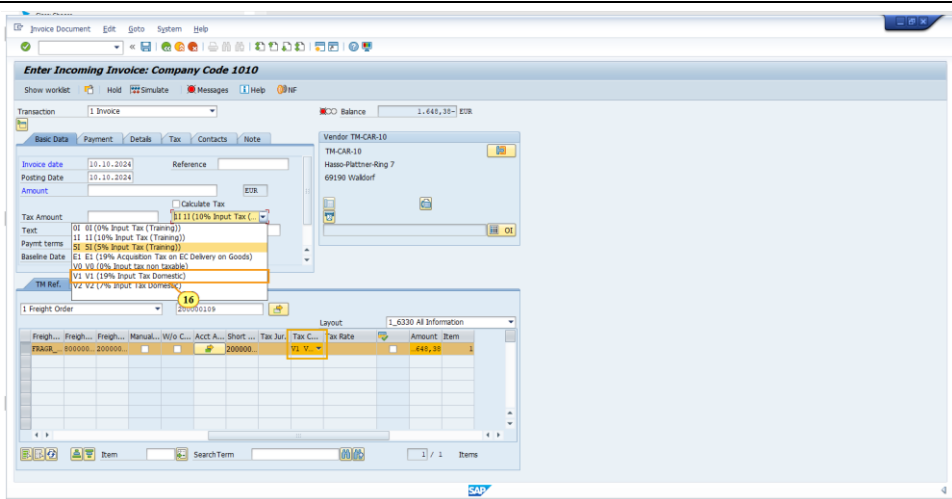

Explanation	Screenshot
4. The settlement date and the responsible organization (purchasing organization) are some of the fields shown in the General Data tab of the freight settlement document. Choose in the area below the scroll bar to scroll down.	
5. In the Charges tab, you will find the charges that will be settled with this freight settlement document. These charges are the same as those in the related freight order(s). Choose the Orders tab to find out, which freight orders are settled with this document.	

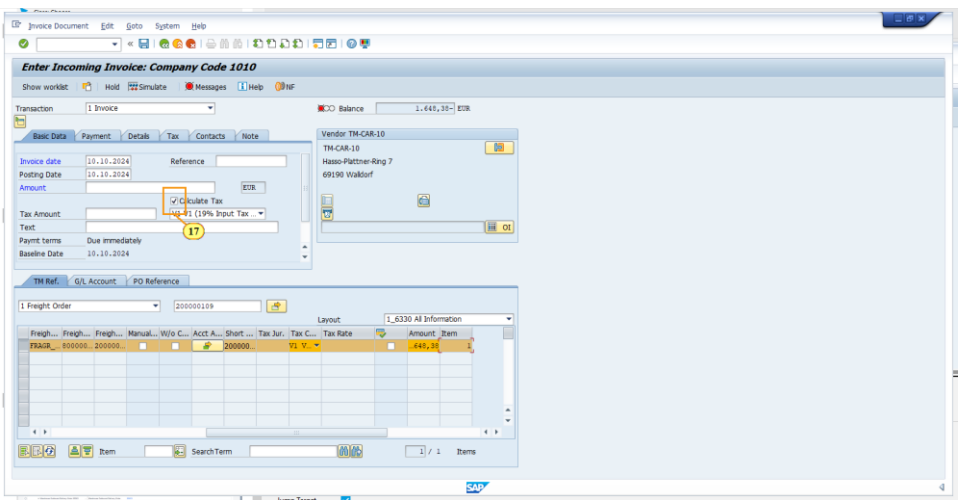

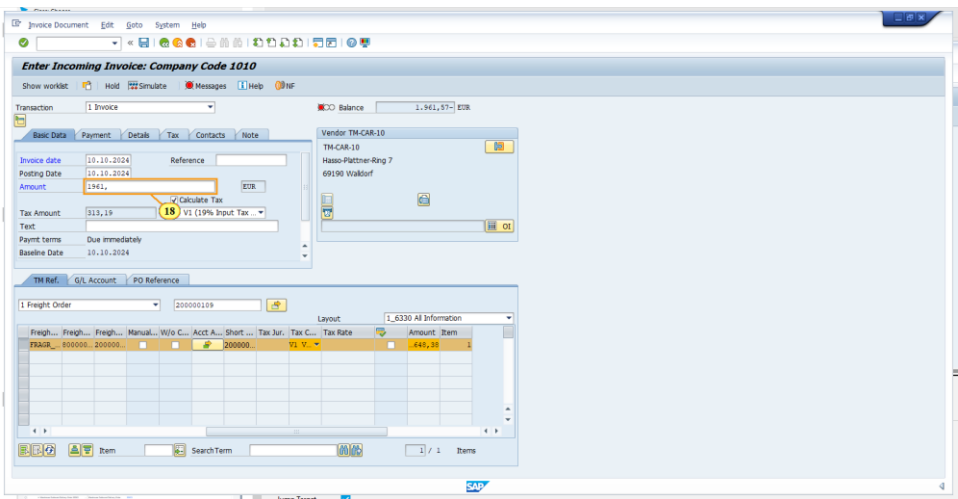

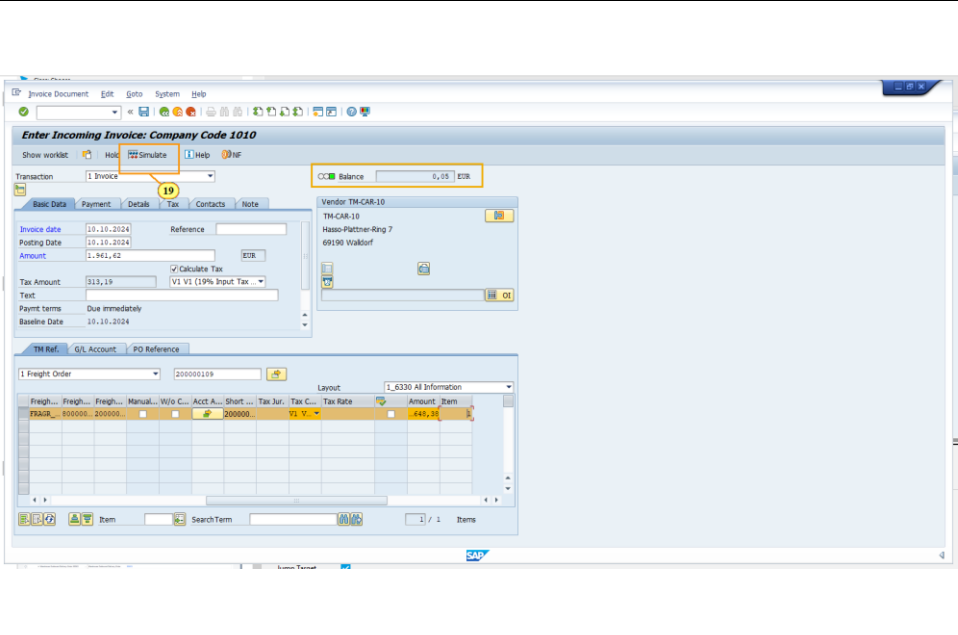

Explanation	Screenshot
6. Only one freight order is settled with this freight settlement document. It is freight order 20000109 from which we have created this document. Choose in the area above the scroll bar to scroll up.	
7. Choose the <i>Business Partner</i> tab to find out which business partners (roles) are involved in this settlement process.	
8. The payee, carrier, and invoicing party are involved in this process. Choose the <i>Statuses</i> tab to proceed.	

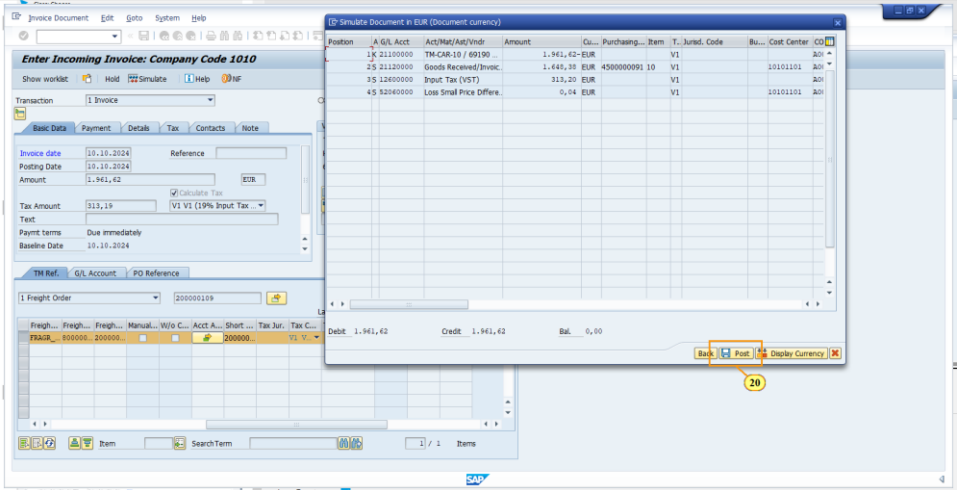

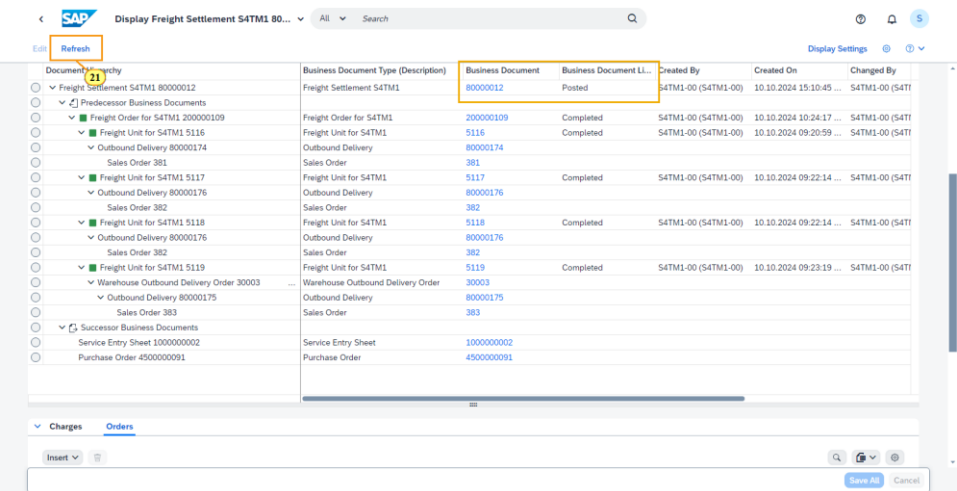

Explanation	Screenshot
9. The Life Cycle Status is Ready for Accruals and the Freight Settlement Confirmation Status is Not Posted. Choose <i>Post</i> to post the freight settlement document.	
10. The Life Cycle Status changed to Posting Started and the Freight Settlement Confirmation Status changed to Not Confirmed. This is an asynchronous process that has been triggered in the background. Choose <i>Refresh</i> to check for the completion of the posting process.	

Explanation	Screenshot
11. The posting process is completed. The Life Cycle Status has changed to Posted and the Freight Settlement Confirmation Status has changed to Confirmed. Choose the <i>Document Flow</i> tab to proceed.	
 In the Document Flow tab, you can find all documents involved in this process. The documents that precede the freight settlement document include the following logistical documents: • Freight order(s) • Freight unit(s) • Outbound deliveries and outbound delivery orders • Sales orders Financial documents created in the MM module succeed the freight settlement document. • Purchase order • Service entry sheet	

Explanation	Screenshot
You want to post the invoice of the carrier, which will be done using the classical SAP GUI. Choose <i>Next</i> to continue.	
12. Enter miro in the Transaction box. Confirm your entry by pressing the Enter key.	
13. Enter company code 1010. Confirm your entry by pressing the Enter key.	

Explanation	Screenshot																								
14. Enter the invoice date 10.10.2024. Confirm your entry by pressing the Enter key.																									
15. Enter freight order number 200000109. Confirm your entry by pressing the Enter key.																									
16. The tax code for the freight order has been determined as V1. Choose the corresponding tax code from the dropdown menu to calculate the taxes accordingly.	 <table data-bbox="501 1599 995 1778"><tr><th>Freight...</th><th>Freight...</th><th>Freight...</th><th>Manual...</th><th>W/o C...</th><th>Accr...</th><th>Short...</th><th>Tax Jur...</th><th>Tax C...</th><th>Tax Rate</th><th>Amount</th><th>Item</th></tr><tr><td>Freight...</td><td>Freight...</td><td>Freight...</td><td>Manual...</td><td>W/o C...</td><td>Accr...</td><td>Short...</td><td>Tax Jur...</td><td>Tax C...</td><td>19.00</td><td>2.645.91</td><td>1</td></tr></table>	Freight... Freight...	Freight...	Freight...	Manual...	W/o C...	Accr...	Short...	Tax Jur...	Tax C...	Tax Rate	Amount	Item														
Freight...	Freight...	Freight...	Manual...	W/o C...	Accr...	Short...	Tax Jur...	Tax C...	19.00	2.645.91	1														

Explanation	Screenshot
17. Select the <i>Calculate Tax</i> check box.	
18. Enter the full amount of 1961,62 EUR. Confirm your entry by pressing the Enter key.	
19. The amount almost matches the calculated result from the freight order plus taxes. The remaining balance is calculated as 0,05 EUR. Choose <i>Simulate</i> to check to which accounts the charges will be posted. You can also press Ctrl+Shift+F7.	

Explanation	Screenshot
20. You can verify that the charges are posted to the intended G/L accounts. Choose <i>Post</i> to post the invoice finally. You can also press Ctrl+S. Afterward, navigate back to your freight settlement document.	
21. Choose <i>Refresh</i> to refresh the freight settlement document.	

Explanation	Screenshot
The invoice becomes visible in the Document Flow and the status of the freight settlement document has been updated to Invoice Verified. This concludes this simulation.
