

Distribute Freight Costs and Bill Transportation Charges to Customers

Explanation	Screenshot
1. Choose the <i>Cost Distribution</i> tab to review how the freight charges are distributed to the delivery items transported with this freight order.	
2. Choose <i>Expand</i> to analyze which charges have been distributed to delivery delivery 80000175.	
The delivery 80000175 must cover 390.15 EUR of the total freight charges. The handling charge has been fully assigned to this delivery. Other charges have been allocated proportionally based on gross weight. Click <i>Next</i> to continue.	

Explanation	Screenshot
3. Create billing was already entered into the search bar for your convenience. Choose the <i>Create Billing Document</i> app.	
4. Delivery 80000175 was already selected for your convenience. Choose <i>Create Billing Documents</i>.	
5. Choose Save to save the invoice document.	

Explanation

6. Choose *Pricing Elements* to check whether the distributed freight charges have been billed to your customer.

The pricing elements include one condition type (FB00) to represent freight charges. The freight charges are 390,15 EUR, which has been taken over from the freight order/freight settlement document.

This concludes this simulation.
