

Explain a Freight Agreement

Explanation	Screenshot
1. Choose the <i>Freight Agreements Worklist</i> app to open the corresponding app.	
2. The freight agreement worklist includes all freight agreements detailing the involved parties, such as the purchasing organization and carrier, along with their validity periods and current release status. Choose the freight agreement <i>FRAGR_S4TM1_CAR10</i> to proceed.	

Explanation	Screenshot
3. On the General Data tab of the freight agreement, you will find information like: • Agreement version • Involved parties (purchasing organization and carrier) • Validity period • Agreement priority • Document currency Choose <i>in the area below the scroll bar</i> to scroll down.	
The freight agreement items (there is only one item in this example) are in the lower part of the screen. The items can have a deviating validity period (from the header). For each item, a calculation sheet defines the logic for how charges are calculated within this freight agreement. This concludes this simulation.
