

Explain Scales

Explanation	Screenshot
1. Choose the <i>Edit Scale</i> app to open the corresponding app.	 The screenshot shows the SAP Charge Management app home screen. The top navigation bar includes 'Home', 'All', and 'Search'. Below the navigation bar, there are several app tiles: 'Charge Management Worklist', 'Create Calculation Sheet', 'Edit Calculation Sheet', 'Create Rate Table Definition', 'Edit Rate Table Definition', 'Create Scale', and 'Edit Scale'. The 'Edit Scale' app is highlighted with a yellow box and a yellow circle with the number 1.
2. For your convenience the scale S4LG1_COUNTRY was already entered. Choose <i>Continue</i> to proceed.	 The screenshot shows the SAP Edit Scale app. The top navigation bar includes 'Edit Scale' and 'Search'. Below the navigation bar, there is a search bar with the text 'Scale: S4LG1_COUNTRY'. At the bottom right, there is a 'Continue' button highlighted with a yellow box and a yellow circle with the number 2.
3. On the General Data tab, the scale is linked to a scale base. In this simulation, the scale pertains to countries. Choose the <i>Items</i> tab to proceed.	 The screenshot shows the SAP Edit Scale app with the 'General Data' tab selected. The 'Items' tab is highlighted with a yellow box and a yellow circle with the number 3. Below the 'Items' tab, there is a 'Basic Data' section with the following information: 'Scale: S4LG1_COUNTRY', 'Description: Country', 'Scale Base: CENTRY', and 'Country'. The 'Scale Base' and 'Country' fields are highlighted with a yellow box.

Explanation	Screenshot
4. On the Items tab, the countries used to establish rates based on this scale are defined. Choose the <i>SAP logo</i> to navigate back to your home page.	
5. Choose the <i>Edit Scale</i> app to open the corresponding app again.	
6. For your convenience a second scale S4LG1_WEIGHT was already entered. Choose <i>Continue</i> to proceed.	

Explanation	Screenshot																					
7. This is a numerical scale. In addition to the scale base, you can specify the type of scale (either From Scale or To Scale), the unit of measure for the scale, and the rounding profile. Choose the <i>Items</i> tab to proceed.	 The screenshot shows the 'Basic Data' tab of the 'Edit Scale S4LG1_WEIGHT' screen. The 'Items' tab is selected, and a yellow box highlights the 'Scale Base' (WEI...), 'Scale Type' (To Scale (+/-)), 'Scale Unit of Measure' (KG), and 'Rounding Profile' (0005) fields. The 'Description' is 'Weight' and the 'Archiving Status' is 'Not Archived'.																					
 On the Items tab, you can define the scale values. In this example, the following rates for weights were established based on this scale: • up to 100 kg • up to 200 kg • up to 500 kg • up to 1.000 kg • up to 5.000 kg • up to 999.999.999 kg This concludes this simulation.	 The screenshot shows the 'Items' tab of the 'Edit Scale S4LG1_WEIGHT' screen. It displays a table of scale values and calculation types. The 'Archiving Status' column is empty. <table><tr><th>Scale Value</th><th>Calculation Type</th><th>Archiving Status</th></tr><tr><td>100</td><td>Relative</td><td></td></tr><tr><td>200</td><td>Relative</td><td></td></tr><tr><td>500</td><td>Relative</td><td></td></tr><tr><td>1.000</td><td>Relative</td><td></td></tr><tr><td>5.000</td><td>Relative</td><td></td></tr><tr><td>999.999.999</td><td>Relative</td><td></td></tr></table>	Scale Value	Calculation Type	Archiving Status	100	Relative		200	Relative		500	Relative		1.000	Relative		5.000	Relative		999.999.999	Relative	
Scale Value	Calculation Type	Archiving Status																				
100	Relative																					
200	Relative																					
500	Relative																					
1.000	Relative																					
5.000	Relative																					
999.999.999	Relative
