

End-to-End Process Demonstration of Advanced Transportation Management

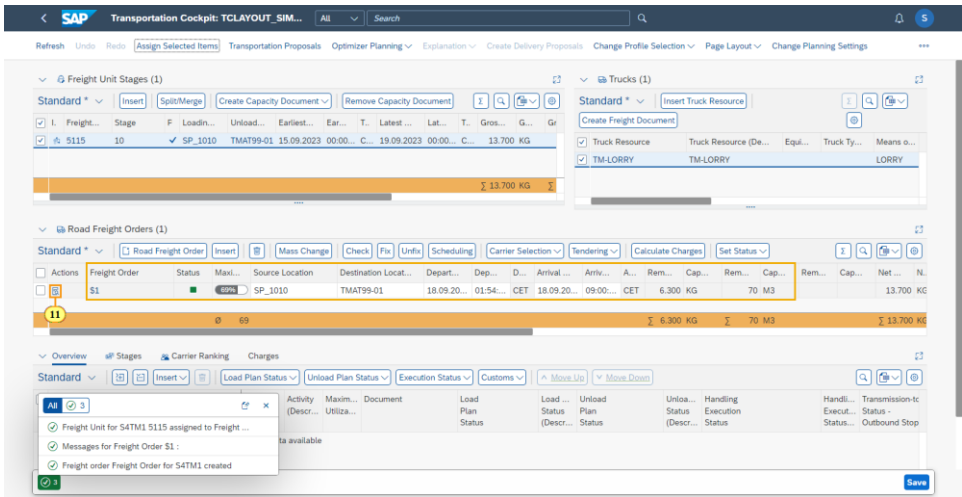

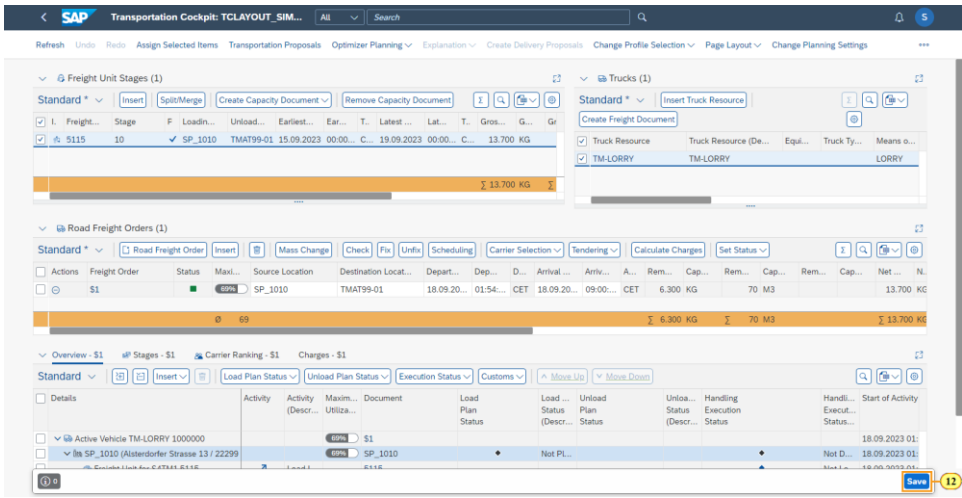

Explanation	Screenshot
 The purpose of this demonstration is to provide an overview about the end-to-end transportation process with advanced transportation management. Choose <i>Next</i> to continue.	
1. Choose Create Sales Orders - VA01 to create a sales order.	
2. Sales orders are created based on a specific order type and with reference to organizational units. Choose <i>Continue</i> to be able to enter the details of a sales order.	

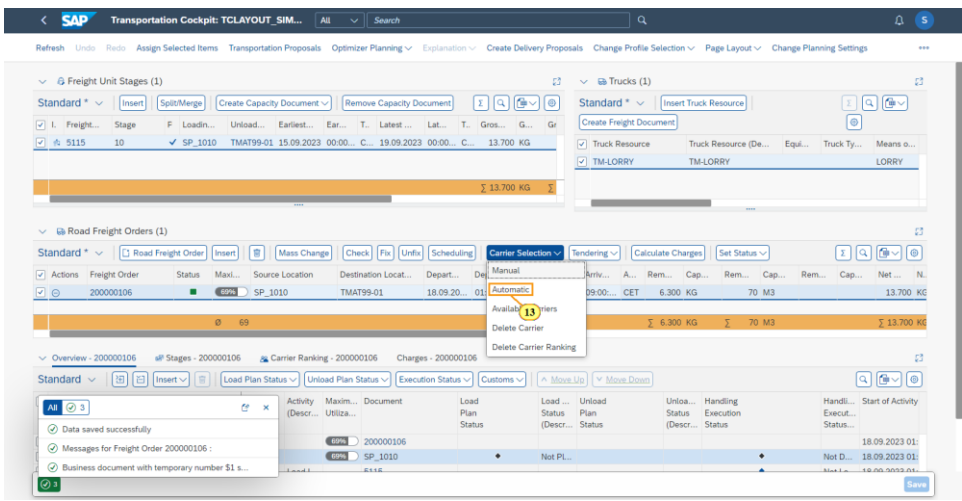

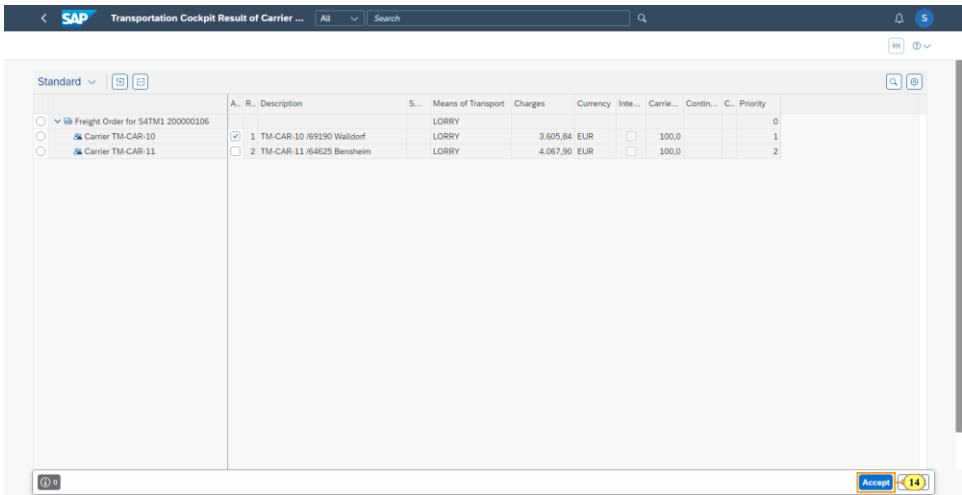

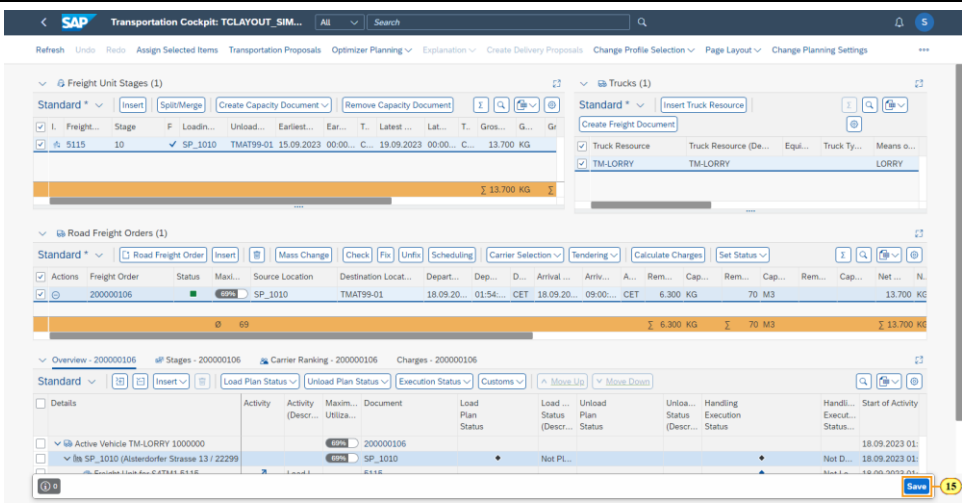

Explanation	Screenshot
3. Key information that needs to be maintained in a sales order are the ordering party (sold-to and ship-to), the requested delivery date and the material (type and quantity) to be sold. Once this information has been entered, the sales order can be saved. Choose Save.	
4. To Display details related to the sales order 377, that has just been created, choose <i>Display</i>.	
5. In this case, sales order 377 is transportation relevant. Therefore, TM Status information is available, which can be displayed by choosing the <i>TM Status</i> tab.	

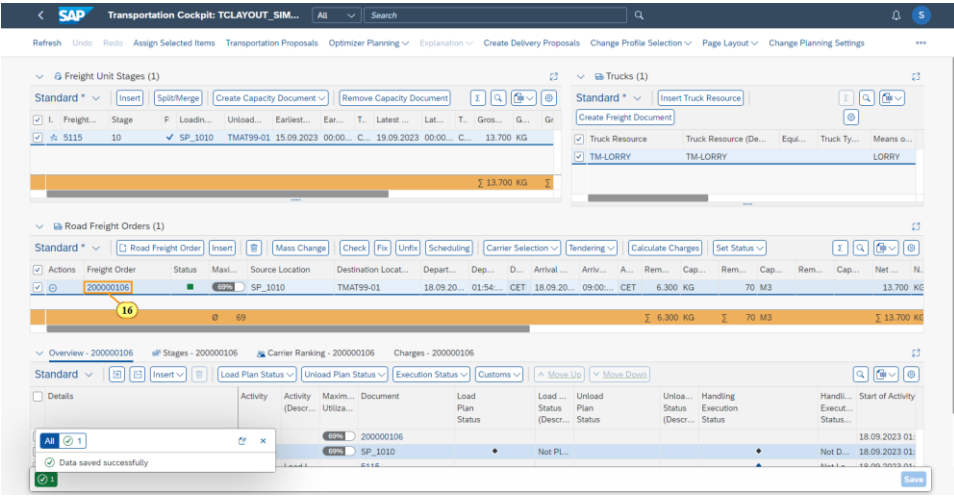

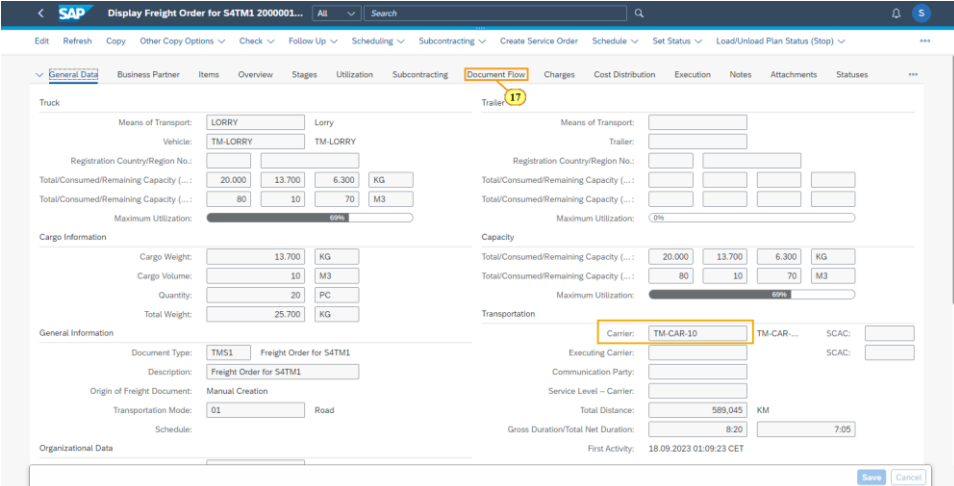

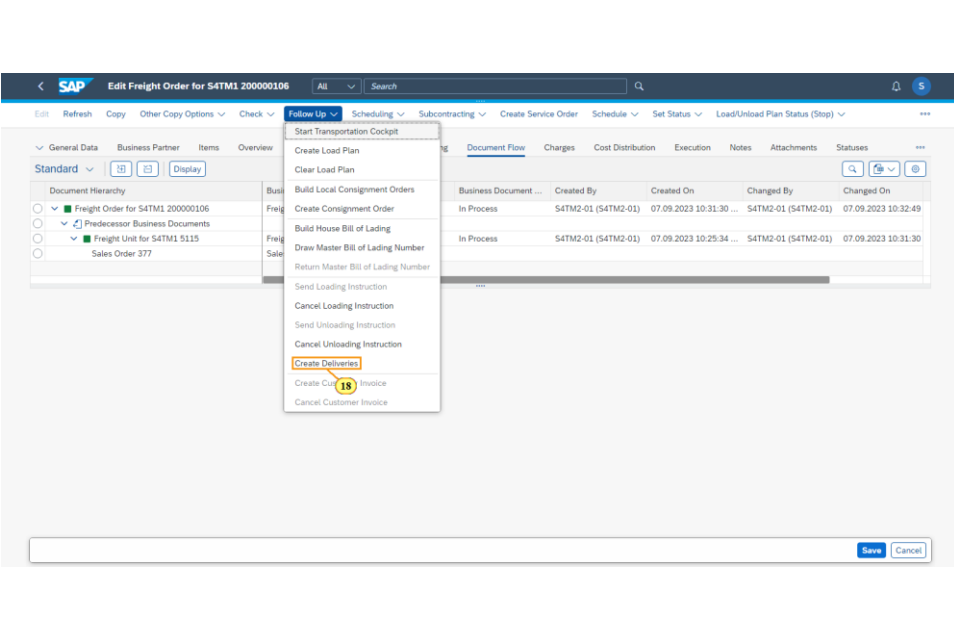

Explanation	Screenshot
6. On the TM Status tab there is information available like the subcontracting status that indicates, whether the related transport for this sales order has been subcontracted to a third party, or the execution status, that indicates whether execution of transportation processes for this sales order have started, are currently in process or have already been finished. Choose <i>SAP</i> to return to your home page.	 The screenshot shows the SAP S4TM1 Order 377: Overview page with the TM Status tab selected. The page displays various fields for the order, including S4TM1 Order (377), Net Value (50,000.00 EUR), Sold to Party (TMA99-01), Ship to Party (TMA99-01), and Cust. Reference (Advanced E2E). The TM Status tab is active, showing a table with columns for SD Document, Control Key, Control Key Description, Life Cycle Status Description, Execution Status Description, Confirmation Status Description, and Subcontracting Status Description. The table contains one row for document 377, with a control key of 0052, a life cycle status of New, an execution status of Not Started, a confirmation status of No Confirmation Yet, and a subcontracting status of No Subcontracting Result.
7. The order integration worklist shows all freight units, that have been created based on orders (sales order, purchase orders or stock transfer orders). It represents the workload for the transportation planner. Choose <i>Order Integration - Worklist</i>.	 The screenshot shows the SAP Home page with the Order Management section selected. The Order Integration Worklist is highlighted, showing a list of freight units. The worklist includes a section for Failed Delivery (7 missing) and a section for Missing Worklist.

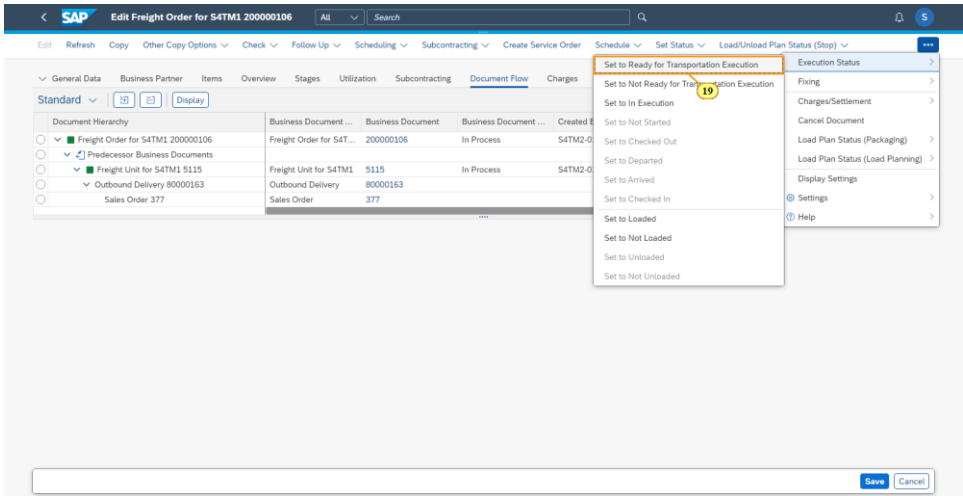

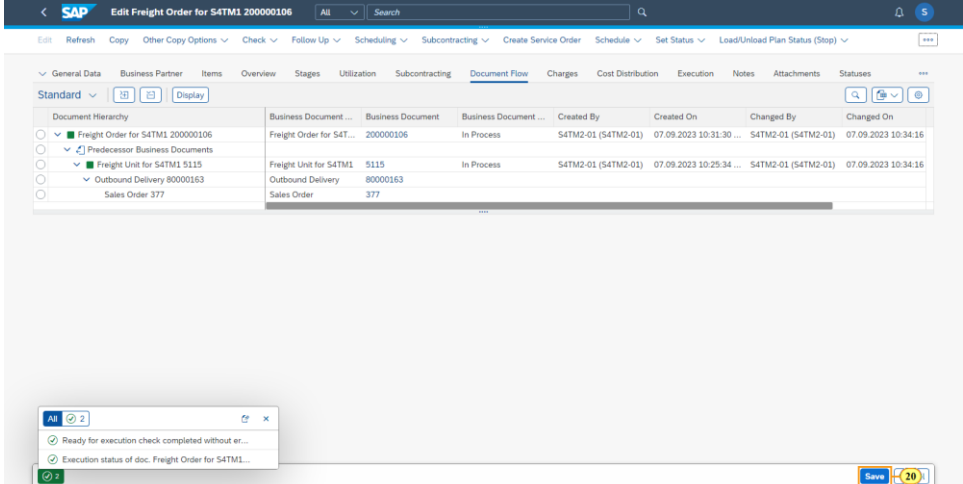

Explanation	Screenshot																																																																																																																														
8. The freight unit that has been created for sales order 377 shows on top of the order integration worklist. Transportation planning can be done automatically in the background or interactively in the Transportation Cockpit. Choose <i>Transportation Cockpit</i> to start interactive transportation planning.	 The screenshot shows the SAP Order Integration - Worklist interface. At the top, there are filters for Freight Orders, Freight Units, Freight Bookings, and Order-Based Transportation Requirements. Below these, a table lists Freight Units for Order ID 377. The 'Transportation Cockpit' button is highlighted with a yellow box. Other buttons like 'Transportation Proposal', 'Create Deliveries', 'Split/Merge', 'Direct Shipment Options', and 'Set Country/Region-Specific ACS Status' are also visible. <table><tr><th>Document</th><th>Documen...</th><th>Order ID</th><th>Descript...</th><th>Customer PO Number</th><th>Source Location</th><th>Source Location Address</th><th>Destination Locati...</th><th>Destination Location Adr</th></tr><tr><td>☒</td><td>5112</td><td>FUT1</td><td>377</td><td>Sales Order</td><td>ADVANCED EZE</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Carl-Benz-Strasse 1 / 68f</td></tr><tr><td>☐</td><td>5111</td><td>FUT2</td><td>373</td><td>Sales Order</td><td>TEST3</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Messeplatz 2 / 45131 Es</td></tr><tr><td>☐</td><td>5110</td><td>FUT2</td><td>372</td><td>Sales Order</td><td>TEST3</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Castroper Strasse 145 / 4</td></tr><tr><td>☐</td><td>5109</td><td>FUT2</td><td>371</td><td>Sales Order</td><td>TEST3</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Königsweil 15 / 44137 D</td></tr><tr><td>☐</td><td>5108</td><td>FUT2</td><td>370</td><td>Sales Order</td><td>TEST2</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Messeplatz 2 / 45131 Es</td></tr><tr><td>☐</td><td>5107</td><td>FUT2</td><td>369</td><td>Sales Order</td><td>TEST2</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Castroper Strasse 145 / 4</td></tr><tr><td>☐</td><td>5106</td><td>FUT2</td><td>368</td><td>Sales Order</td><td>TEST2</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Königsweil 15 / 44137 D</td></tr><tr><td>☐</td><td>5105</td><td>FUT2</td><td>367</td><td>Sales Order</td><td>TEST1</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Messeplatz 2 / 45131 Es</td></tr><tr><td>☐</td><td>5104</td><td>FUT2</td><td>366</td><td>Sales Order</td><td>TEST1</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Castroper Strasse 145 / 4</td></tr><tr><td>☐</td><td>5103</td><td>FUT2</td><td>365</td><td>Sales Order</td><td>TEST1</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Königsweil 15 / 44137 D</td></tr><tr><td>☐</td><td>5051</td><td>FUT2</td><td>340</td><td>Sales Order</td><td>PB-00</td><td>SP_1010</td><td>Alsterdorfer Strasse 13 / ...</td><td>Königsweil 15 / 44137 D</td></tr><tr><td>☐</td><td>3</td><td>FU99</td><td>177</td><td>Sales Order</td><td>C445999</td><td>SP_10WM</td><td>Neurotitz: 16 / 69190 Wa...</td><td>T-CUS99C Karl Benz Str. 01 / 70198</td></tr><tr><td>☐</td><td>2</td><td>FU99</td><td>176</td><td>Sales Order</td><td>B445999</td><td>SP_10WM</td><td>Neurotitz: 16 / 69190 Wa...</td><td>T-CUS99B Karl Benz Str. 01 / 76198</td></tr></table>	Document	Documen... 9. How planning is done and how the planning relevant information is displayed can be configured. The planning profile defines how planning is done (e.g. which resources are available, how to select the best carrier) and the page layout defines how this information is displayed on the screen. When entering the transportation cockpit a combination of planning profile and page layout is	 The screenshot shows the SAP Transportation Cockpit: Profile and Layout configuration screen. It displays a table for configuring planning profiles and page layouts. The 'PLAN_S4TM1' profile is selected, and the 'TCLAYOUT_SIMPLE' layout is chosen. The 'Default Start Screen' is set to 'TCLAYOUT_SIMPLE'. The 'Hide Screen' checkbox is unchecked. A 'Continue' button is visible at the bottom right. <table><tr><th>Descript...</th><th>N...</th><th>Freigh... Select...</th><th>Transp... Select...</th><th>Cons... Select...</th><th>Freigh... Explanation	Screenshot
selected. Choose <i>Continue</i> to open the transportation cockpit.	
10. The transportation cockpit lists the freight units (loading location, unloading location, pickup date, delivery date, weight, volume, ...) that need to be planned as well as available trucks (capacities). In order to assign the selected freight unit to the truck resource TM-LORRY select the truck resource and choose <i>Assign Selected Items</i>. (Of course, using drag and drop would also work for this purpose.)	 The screenshot displays the SAP Transportation Cockpit interface for a simulation titled 'TCLAYOUT_SIM...'. The interface is divided into several sections: Freight Unit Stages (1): A table listing freight units. The first unit is highlighted with a yellow box and a red circle containing the number 10. The table columns include: I. Freight..., Stage, F. Loadin..., Unload..., Earliest..., Ear..., T. Latest..., Lat..., T. Gros..., G..., and Gr. The highlighted unit has Stage 10, F. Loadin... SP_1010, Unload... TMA799-01, Earliest... 15.09.2023 00:00, Ear... 19.09.2023 00:00, T. Gros... 13.700 KG, and Gr. 1. Trucks (1): A table listing available trucks. The first truck is highlighted with a yellow box. The table columns include: Standard..., Insert Truck Resource, Create Freight Document, Truck Resource, Truck Resource (De..., Equi..., Truck Ty..., Means o..., and LORRY. The highlighted truck is TM-LORRY. Road Freight Orders (0): A section for managing freight orders, currently empty. Overview: A section for managing the overall transportation plan, including tabs for Stages, Carrier Ranking, and Charges. The 'Assign Selected Items' button is highlighted in the top navigation bar.

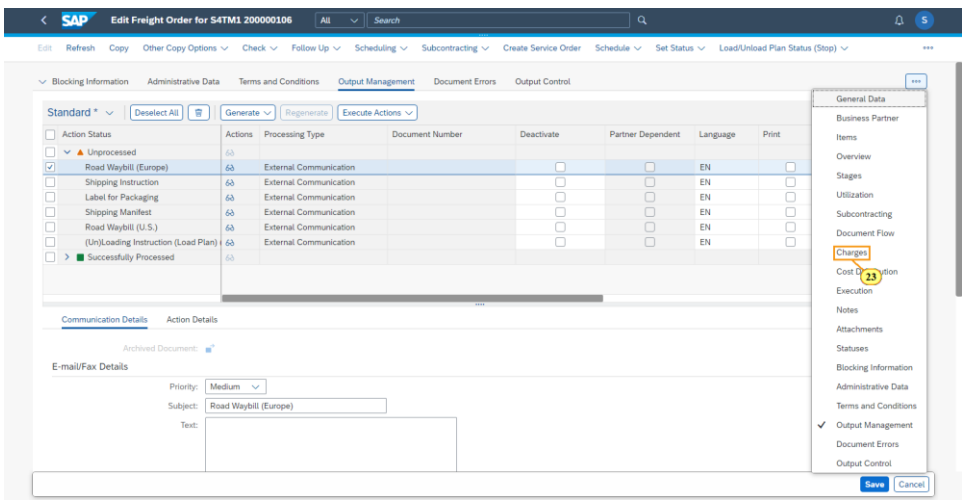

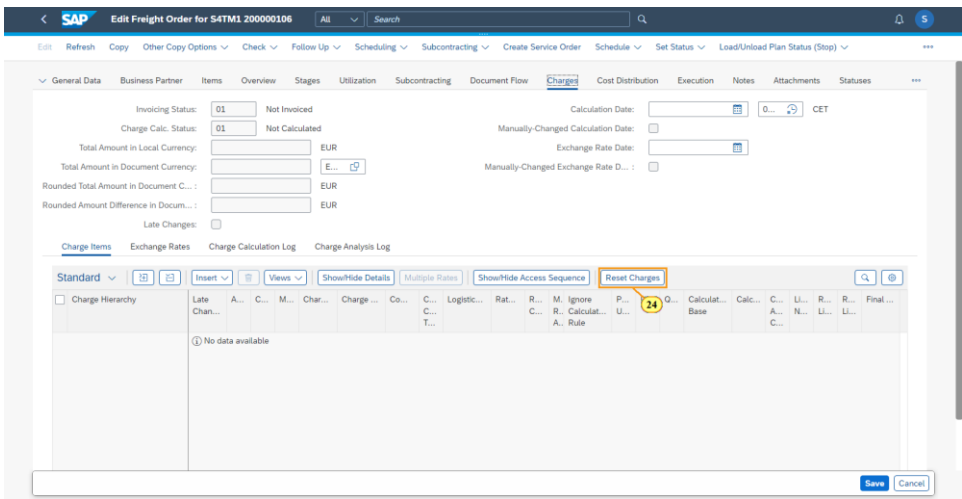

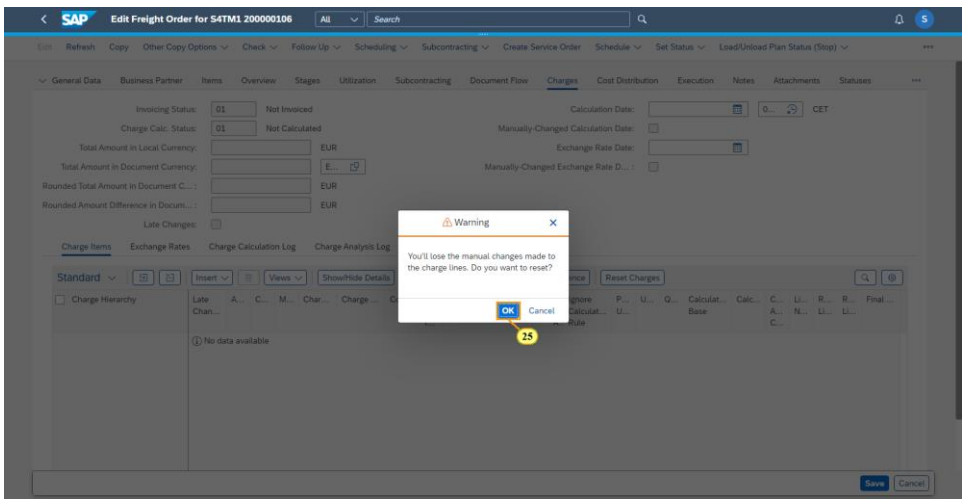

Explanation	Screenshot
11. The result of the assignment of freight units to a truck resource is a freight order. The system displays the source and destination location of the freight order as well as departure and arrival time, utilization, remaining capacity and others. Choose <i>Actions - Details</i> to explore further the details of the planning result.	
12. Choose Save to save your freight order.	

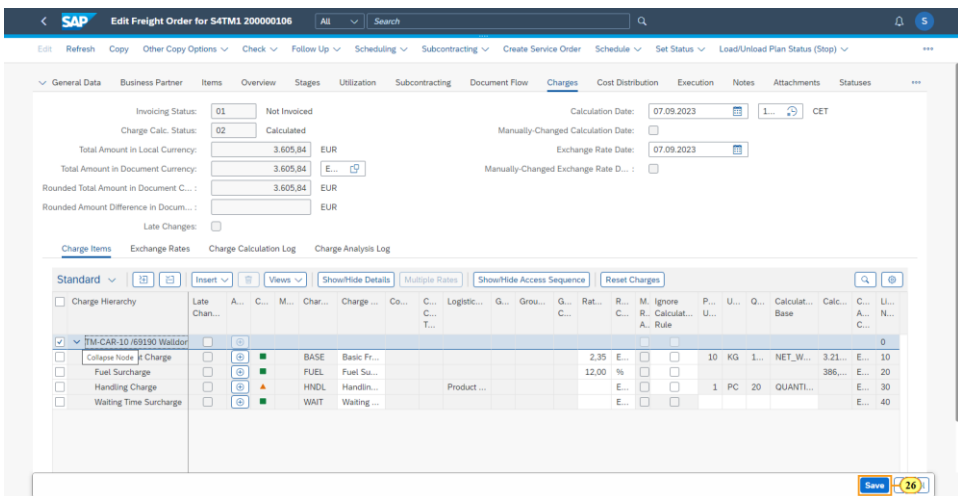

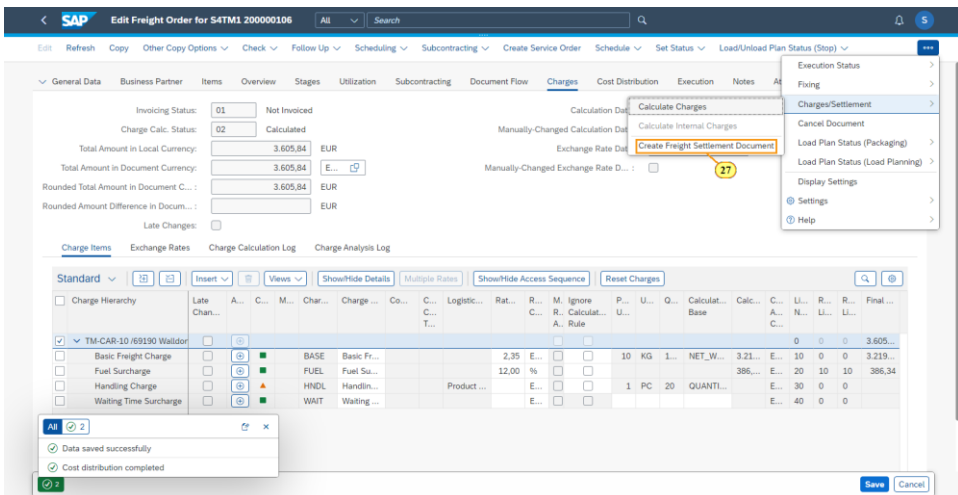

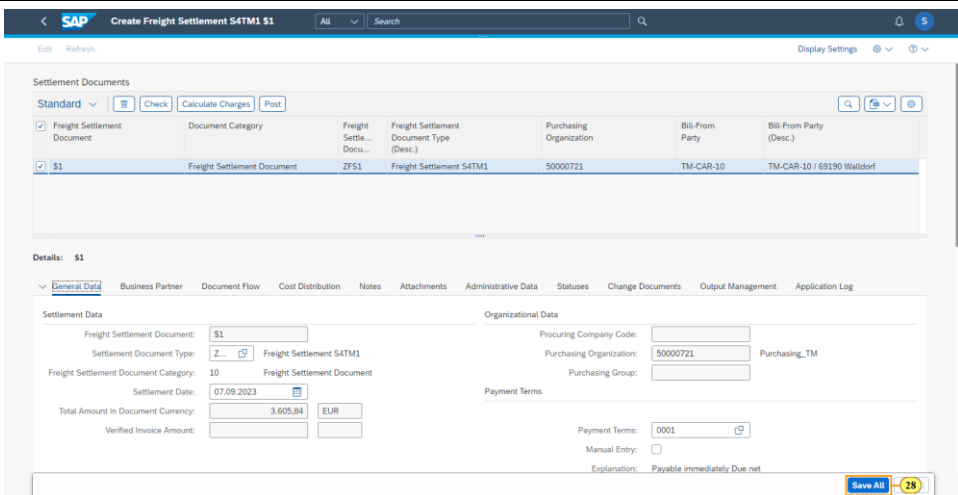

Explanation	Screenshot
13. The subcontracting process can be initiated in the transportation cockpit directly by choosing <i>Carrier Selection - Automatic</i> .	 The screenshot shows the SAP Transportation Cockpit interface. The 'Carrier Selection' dropdown menu is open, showing options: 'Manual', 'Automatic' (highlighted with a yellow box and a red circle), 'Delete Carrier', and 'Delete Carrier Ranking'. The background shows various data tables for Freight Unit Stages, Trucks, and Road Freight Orders.
14. In the carrier selection result screen, the system shows all eligible carriers as well as the estimated charges based on your freight agreements. In this case the carrier with the lowest cost is pre-selected. Accept the carrier selection result by choosing <i>Accept</i> .	 The screenshot shows the 'Carrier Selection Result' screen. It displays a table with columns: A., R., Description, S., Means of Transport, Charges, Currency, Inte., Carri..., Contin..., C., Priority. The table lists two carriers: 'Carrier TM-CAR-10' and 'Carrier TM-CAR-11'. The 'Carrier TM-CAR-10' is pre-selected. At the bottom right, there is an 'Accept' button with a yellow circle and the number 14.
15. Choose <i>Save</i> to save your freight order.	 The screenshot shows the SAP Transportation Cockpit interface. At the bottom right, there is a 'Save' button with a yellow circle and the number 15. The background shows various data tables for Freight Unit Stages, Trucks, and Road Freight Orders.

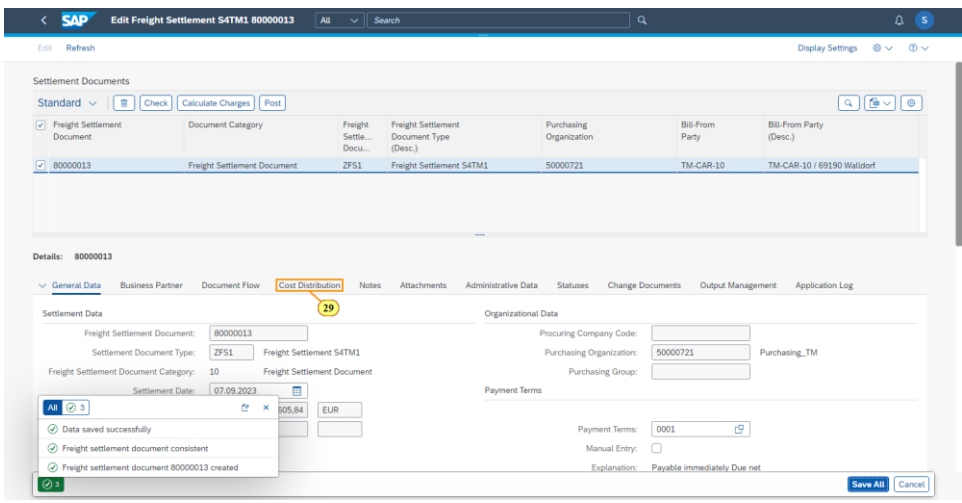

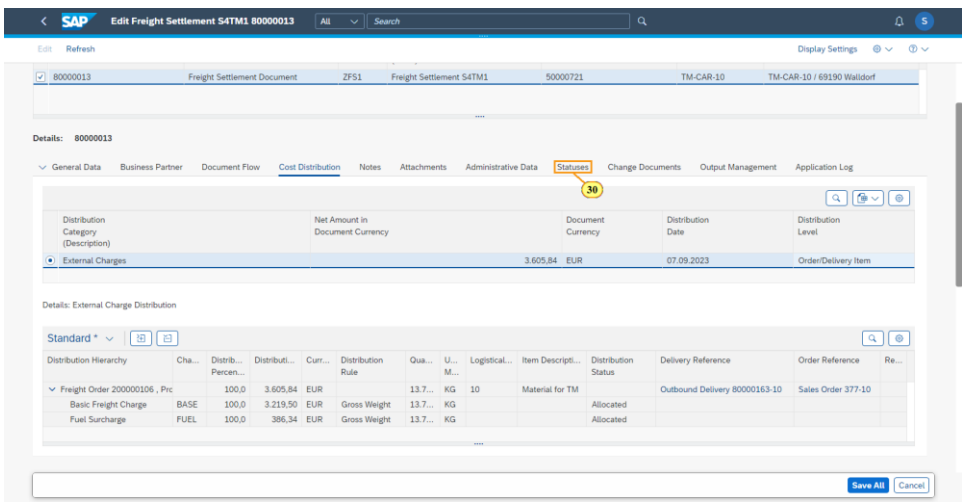

Explanation	Screenshot
16. You can directly navigate into the freight order details by clicking on the <i>freight order number</i> [200000106].	 The screenshot shows the SAP Transportation Cockpit interface. The 'Freight Unit Stages' section displays a table with columns for Freight Unit, Stage, Load, Unload, Earliest, Earliest, T. Latest, Lat., T. Gross, G., and Gr. The 'Road Freight Orders' section displays a table with columns for Actions, Freight Order, Status, Max., Source Location, Destination Locat., Depart., Dep., D., Arrival, Arriv., A., Rem., Cap., Rem., Cap., Rem., Cap., Net, and N. The freight order number 200000106 is highlighted in the Road Freight Orders table.
17. Choose <i>Document Flow</i> to show the current document flow.	 The screenshot shows the SAP Display Freight Order for S4TM1 200000106. The 'Document Flow' tab is selected, showing the current document flow. The 'Truck' section displays details for the Lorry, including Registration Country/Region No., Total/Consumed/Remaining Capacity, and Maximum Utilization. The 'Trailer' section displays details for the Trailer, including Registration Country/Region No., Total/Consumed/Remaining Capacity, and Maximum Utilization. The 'General Information' section displays details for the Freight Order, including Document Type, Description, Origin of Freight Document, Transportation Mode, and Schedule.
18. The document flow consists of the sales order that initiated the process. The freight unit that was created based on the sales order and the freight order that you have created in the previous steps in the transportation cockpit. Since the planning process is finished and you want to initiate the execution	 The screenshot shows the SAP Edit Freight Order for S4TM1 200000106. The 'Document Flow' tab is selected, showing the current document flow. The 'Follow Up' menu is open, displaying options such as 'Start Transportation Cockpit', 'Create Load Plan', 'Build Local Consignment Orders', 'Create Consignment Order', 'Build House Bill of Lading', 'Draw Master Bill of Lading Number', 'Return Master Bill of Lading Number', 'Send Loading Instruction', 'Cancel Loading Instruction', 'Send Unloading Instruction', 'Cancel Unloading Instruction', 'Create Deliveries', 'Create Customer Invoice', and 'Cancel Customer Invoice'. The 'Create Deliveries' button is highlighted.

Explanation	Screenshot
process, trigger the creation of deliveries by choosing <i>Create Deliveries</i>.	
19. The document flow includes the delivery document now. It has been inserted between the sales order and freight unit. The freight order is ready for execution. Choose <i>Set to Ready for Transportation Execution</i> to indicate that the freight order is now ready for transportation execution.	
20. Choose <i>Save</i> to save the status change.	

Explanation	Screenshot
21. Choose the <i>Output Management</i> tab to check the readiness of print documents.	
22. The system has prepared several output documents. On the <i>Output Management</i> tab you can preview these documents, change their language, print, fax and e-mail them. Choose <i>Actions - Display</i> to review the CMR road waybill (a standard document for road transport in Europe).	
 The document has been prepared as a PDF document. It includes information about the shipper, consignee, carrier, material to be transported etc. Choose <i>Next</i> to return to the freight order.	

Explanation	Screenshot
23. To check the freight charges that have been calculated for the freight order navigate to the <i>Charges</i> tab.	
24. Choose <i>Reset Charges</i> to initiate charge calculation.	
25. Choose <i>OK</i> to confirm the pop-up window.	

Explanation	Screenshot
26. On the Charges tab you check whether all charges have been calculated correctly. You observe that the basic freight charge and fuel surcharge have been automatically calculated. Save the freight order by choosing Save.	
27. In order to settle freight charges, you have to create a freight settlement document. This can be done interactively from the freight order or via a background report automatically. Choose <i>Create Freight Settlement Document</i>.	
28. Choose <i>Save All</i> to save the freight settlement document.	

Explanation	Screenshot
29. To check that the total freight charges are distributed correctly to the delivery items you navigate to the <i>Cost Distribution</i> tab.	
30. The cost distribution result shows how the total freight charges have been distributed among the delivery / sales order items that have been transported with this freight order. Since only one delivery is assigned to this freight order, 100% of the charges are assigned to the delivery/sales order item. Navigate to the <i>Statuses</i> tab to review freight settlement document statuses.	

Explanation	Screenshot
31. The freight settlement document is initially Ready for Accruals. By choosing <i>Post</i>, the accruals will be posted to FI/CO.	
32. The posting triggers an asynchronous process in the background. This is indicated by the life cycle status being Posting Started and confirmation status Not Confirmed. <i>Refresh</i> the screen to review whether posting was successful.	
<i>i</i> If the posting was successful, this is indicated by life cycle status Posted and confirmation status Confirmed. If posting was not successful, this would have been indicated by corresponding statuses and detailed messages on the Application Log tab.	

Explanation	Screenshot
Choose <i>Next</i> to conclude this demonstration.
