

Subcontracting Freight Orders

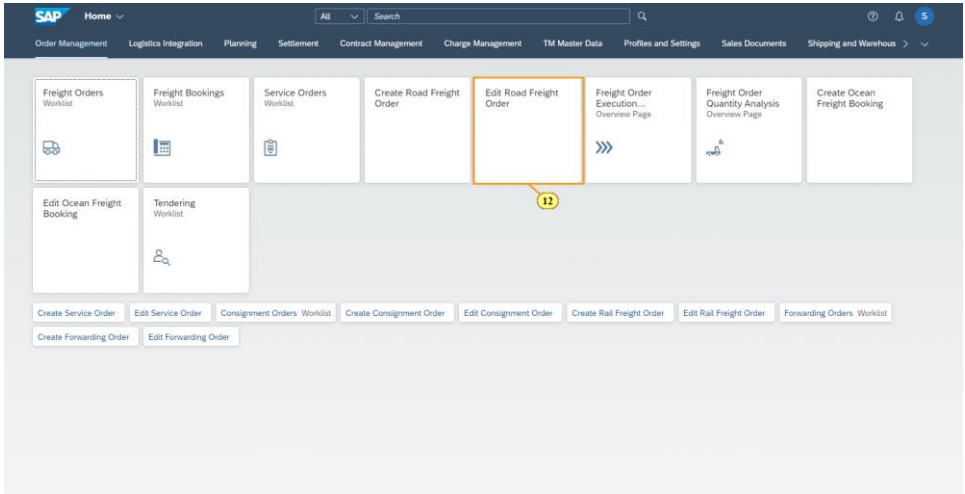

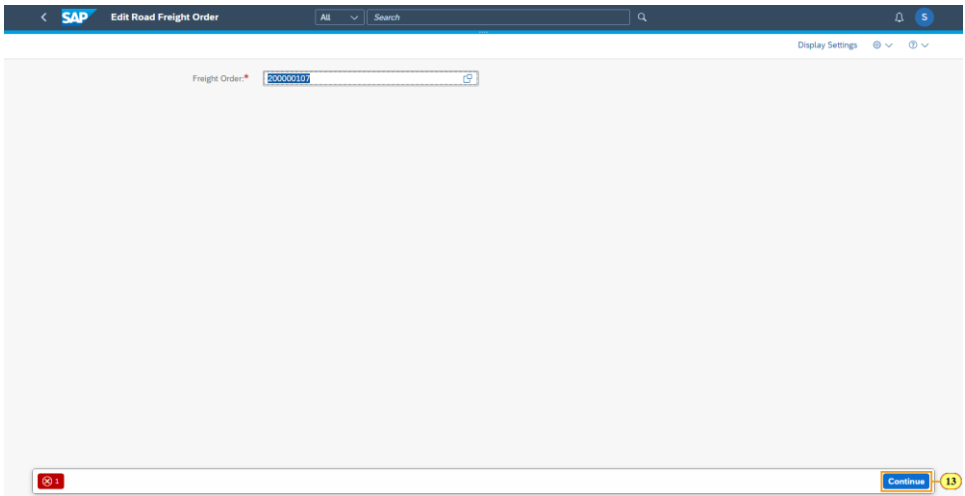

Explanation	Screenshot
 The purpose of this demonstration is to show how you can subcontract freight orders and monitor business shares amongst carriers. Choose <i>Next</i> to continue.	
1. In the beginning of the process, you want to review the current assignment of carriers towards freight orders and the relation toward there target business share. Choose <i>Edit Business Share</i>.	
2. The business shares for this year are planned in business share document 13. Choose <i>Continue</i> to review current business shares.	

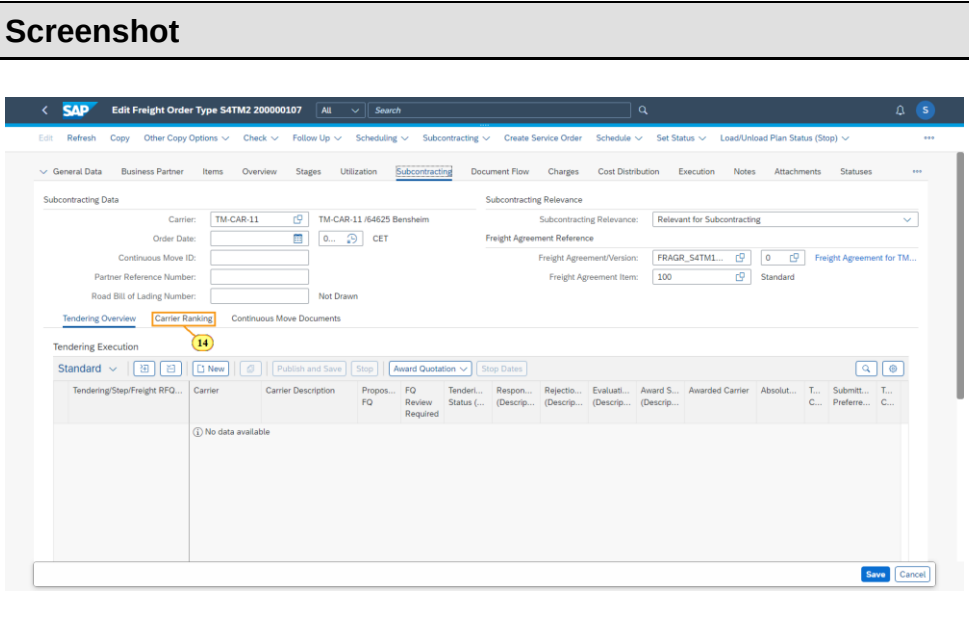

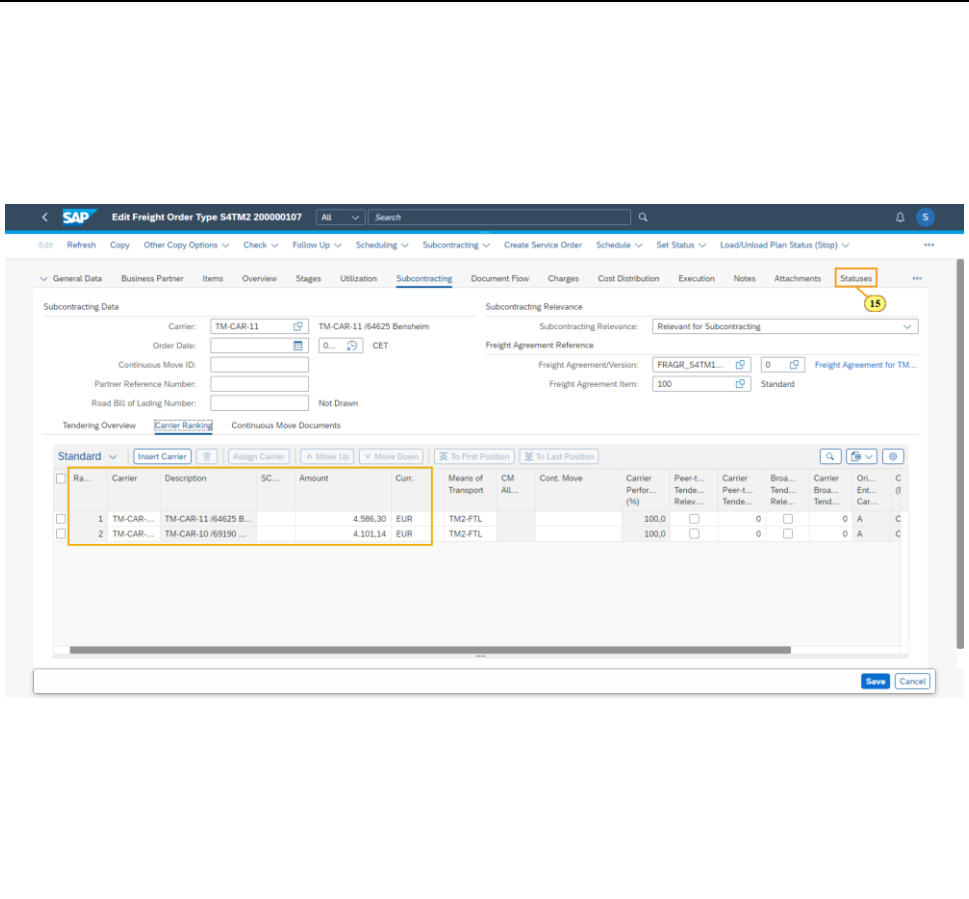

Explanation	Screenshot
3. Both carriers TM-CAR-10 and TM-CAR-11 have not been assigned to any freight order. Their current share is 0%. However, their target share is 50% each. Choose <i>SAP</i> to return to the home page.	
4. There are different ways on how you can select the right carrier in Transportation Management. One option is the Carrier Selection app which you will use in this simulation. Choose <i>Carrier Selection</i> to continue.	
5. In the Carrier Selection app the freight orders ready for carrier selection are shown. In this example, there are three freight orders awaiting carrier selection. Neither freight order has been assigned a carrier as of now.	

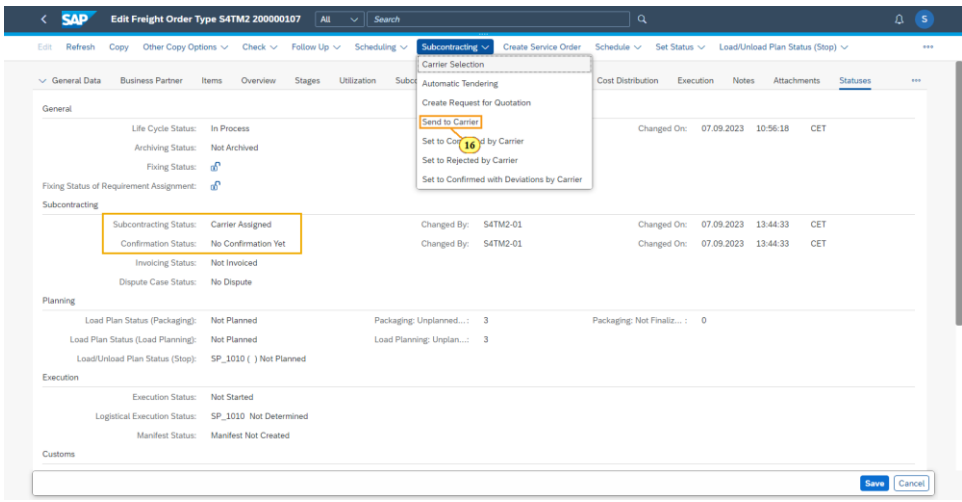

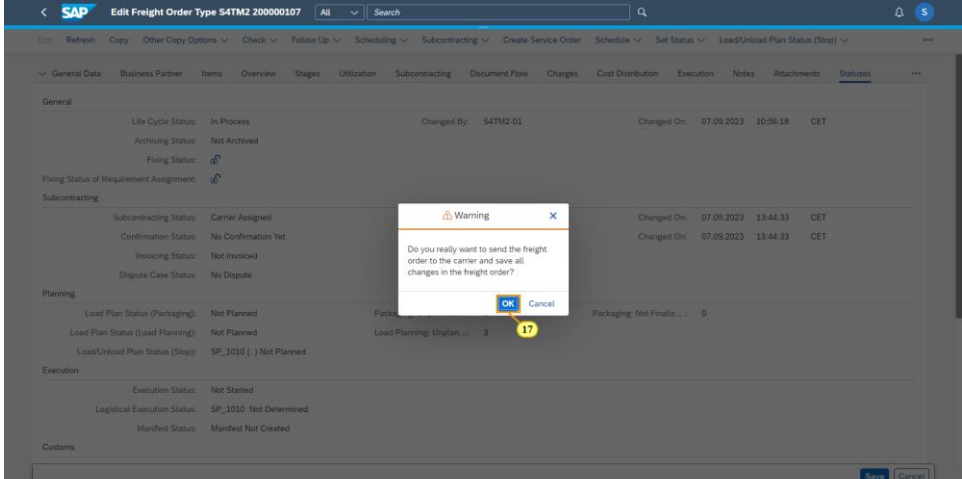

Explanation	Screenshot
Choose <i>Automatic</i> to initiate optimized carrier selection based on freight cost and business shares.	
6. After carrier selection, each freight order has been assigned to a carrier. Since you wanted to allocate the freight orders 50:50 between carriers, the algorithm has chosen to assign one carrier (TM-CAR-10) to two freight orders and the second one (TM-CAR-11) to the third freight order. This ratio comes closest to the desired target share. If there was no target share, the algorithm would have chosen the cheapest carrier for all freight orders. However, in this case to come closer to the target share, the algorithm has also chosen the more expensive carrier (TM-CAR-11) once.	
Choose <i>Show Details</i> to review the carrier ranking for freight order 20000107.	

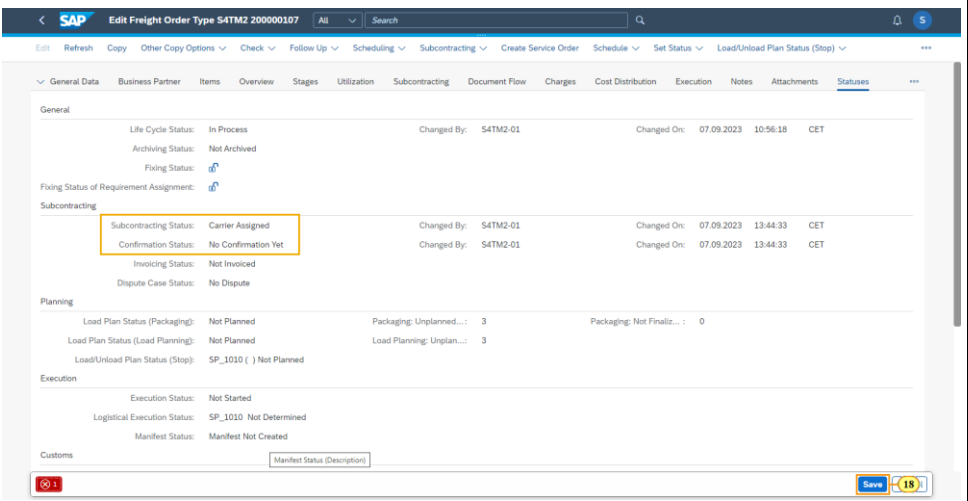

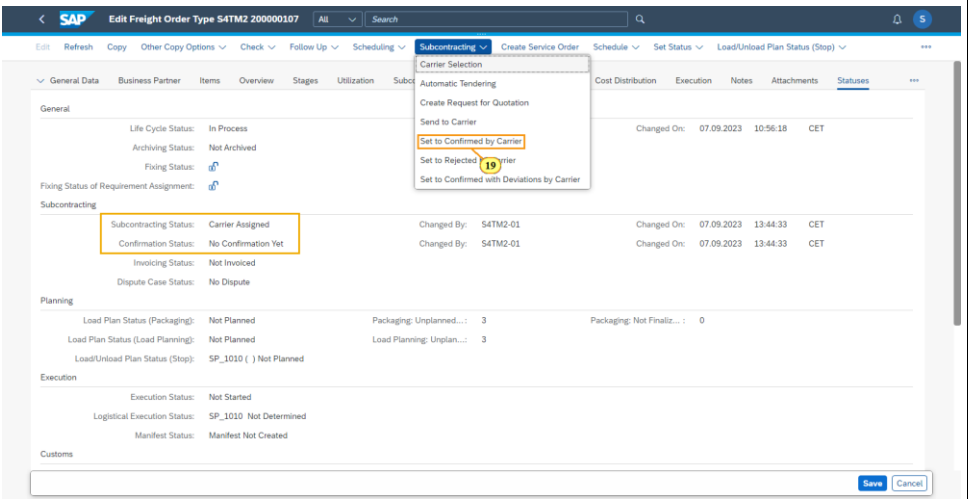

Explanation	Screenshot																																																					
7. Carrier TM-CAR-11 has been chosen for this freight order, although the carrier is more expensive. This is because of the business share. Choose Save to save your planning result.	 The screenshot shows the SAP Road Freight Orders (3) interface. The top bar indicates 'Carrier Selection: S4TM2-CS - S4TM2-CS'. The main table lists three freight orders with their respective carriers and costs. The 'Save' button is highlighted in the bottom right corner. <table><tr><th>Freight Order</th><th>Sta...</th><th>Ma...</th><th>Source Location</th><th>Destination Location</th><th>Carrier</th><th>Departure D...</th><th>Departure...</th><th>D...</th><th>Arrival Date</th><th>Arrival T...</th><th>A...</th><th>Re...</th><th>Ca...</th></tr><tr><td>200000102</td><td>720</td><td>SP_1010</td><td>TM2G00-03</td><td>TM-CAR-10</td><td>14.09.2023</td><td>18:30:56</td><td>C...</td><td>15.09.2023</td><td>00:53:50</td><td>C...</td><td>5.615</td><td>KG</td></tr><tr><td>200000103</td><td>720</td><td>SP_1010</td><td>TM2G00-03</td><td>TM-CAR-10</td><td>14.09.2023</td><td>18:30:56</td><td>C...</td><td>15.09.2023</td><td>00:53:50</td><td>C...</td><td>5.615</td><td>KG</td></tr><tr><td>200000107</td><td>720</td><td>SP_1010</td><td>TM2G00-03</td><td>TM-CAR-11</td><td>14.09.2023</td><td>18:30:56</td><td>C...</td><td>15.09.2023</td><td>00:53:50</td><td>C...</td><td>5.615</td><td>KG</td></tr></table>	Freight Order	Sta... Explanation	Screenshot																											
10. The business shares for this year are planned in business share document 13. Choose <i>Continue</i> to review current business shares.	 The screenshot shows the SAP 'Edit Business Share' interface. At the top, there's a header bar with the SAP logo and navigation icons. Below it, the 'Business Share' field is highlighted with a yellow box. A 'Continue' button is located at the bottom right of the screen.																											
11. Both carriers TM-CAR-10 and TM-CAR-11 have been assigned to freight orders. Their current share is 66% to 33%. However, their target share is 50% each. The target share cannot always be matched exactly, because this depends on the number of freight orders. Choose <i>SAP</i> to return to the home page.	 The screenshot shows the SAP 'Edit Business Share 13' interface. It displays a table with columns: Description, Tar..., Cur..., Cur..., t, Pen. Costs for Ex..., Penalty Costs for ..., Neg..., and Posit... The table lists two carriers: TM-CAR-10 and TM-CAR-11. Their current shares are 66.7% and 33.3% respectively. A yellow box highlights the current share values. A 'Save' button is located at the bottom right of the screen. <table><tr><th>Description</th><th>Tar...</th><th>Cur...</th><th>Cur...</th><th>t</th><th>Pen. Explanation	Screenshot
12. Subcontracting freight orders to carriers can be initiated for individual freight orders or a group of freight orders. It can be initiated interactively or automatically in the background. You want to send the freight order to a carrier manually. Choose <i>Edit Road Freight Order</i> to open the freight order.	 The screenshot shows the SAP Home dashboard. The top navigation bar includes 'SAP Home', a search bar, and various menu items like 'Order Management', 'Logistics Integration', 'Planning', 'Settlement', 'Contract Management', 'Charge Management', 'TM Master Data', 'Profiles and Settings', 'Sales Documents', and 'Shipping and Warehouse'. Below the navigation bar, there are several tiles for different freight order types. The 'Edit Road Freight Order' tile is highlighted with a yellow box, and a yellow callout bubble with the number '12' points to it. Other tiles include 'Freight Orders Worklist', 'Freight Bookings Worklist', 'Service Orders Worklist', 'Create Road Freight Order', 'Freight Order Execution... Overview Page', 'Freight Order Quantity Analysis Overview Page', 'Create Ocean Freight Booking', 'Edit Ocean Freight Booking', and 'Tendering Worklist'. At the bottom, there are more tiles for 'Create Service Order', 'Edit Service Order', 'Consignment Orders Worklist', 'Create Consignment Order', 'Edit Consignment Order', 'Create Rail Freight Order', 'Edit Rail Freight Order', and 'Forwarding Orders Worklist'.
13. Choose <i>Continue</i> to open the road freight order 200000107.	 The screenshot shows the 'Edit Road Freight Order' screen in SAP. The top navigation bar includes 'SAP', a search bar, and a 'Display Settings' button. Below the navigation bar, there is a 'Freight Order' field with the value '200000107'. At the bottom right of the screen, there is a blue 'Continue' button highlighted with a yellow box, and a yellow callout bubble with the number '13' points to it.

Explanation	Screenshot																																																
14. The Subcontracting tab provides all information in the freight order relevant to the subcontracting process. You want to check the carrier ranking first. Choose <i>Carrier Ranking</i> to open the tab.	 The screenshot shows the SAP 'Edit Freight Order Type S4TM2 200000107' interface. The 'Subcontracting' tab is selected. Under 'Subcontracting Data', the 'Carrier' is 'TM-CAR-11' and 'TM-CAR-11 /64625 Bensheim'. The 'Subcontracting Relevance' is 'Relevant for Subcontracting'. The 'Freight Agreement Reference' is 'FRAGR_S4TM1...' and 'Freight Agreement Item' is '100'. The 'Carrier Ranking' tab is highlighted with a yellow circle and the number '14'. Below the tabs, there is a table with columns: 'Tendering/Step/Freight RFQ...', 'Carrier', 'Carrier Description', 'Propos. FQ', 'FQ Review Required', 'Tender Status', 'Response', 'Reject', 'Evaluation', 'Award S...', 'Awarded Carrier', 'Absolute', 'T. C.', 'Submit', 'T. C.'. The table shows 'No data available'.																																																
15. The carrier ranking tab on each freight order shows the information that has been created as part of the carrier selection process. You can find all eligible carriers here as well as their prices and their current ranking position (based on the automatic carrier selection process or based on a manual ranking). Choose the <i>Statuses</i> tab to check subcontracting statuses of the freight order.	 The screenshot shows the same SAP interface, but the 'Statuses' tab is selected. The 'Carrier Ranking' tab is highlighted with a yellow circle and the number '15'. Below the tabs, there is a table with columns: 'Ra...', 'Carrier', 'Description', 'SC...', 'Amount', 'Cum.', 'Means of Transport', 'CM All...', 'Cont. Move', 'Carrier Perform. (%)', 'Peer-t. Relev.', 'Carrier Peer-t. Relev.', 'Bro-s. Relev.', 'Carrier Bro-s. Relev.', 'Ori. Car.', 'C. (I)'. The table shows two rows of data: <table><tr><th>Ra...</th><th>Carrier</th><th>Description</th><th>SC...</th><th>Amount</th><th>Cum.</th><th>Means of Transport</th><th>CM All...</th><th>Cont. Explanation	Screenshot
16. The subcontracting status of the freight order is Carrier Assigned, because you have automatically taken over the first ranked carrier of your ranking into the freight order. However, you have not informed the carrier as of now and therefore the carrier has not confirmed yet (Confirmation Status). Since you are satisfied with the carrier ranking, you send the freight order to the carrier. (Of course this can be done also automatically.) Choose <i>Send to Carrier</i>.	
17. Confirm the action by choosing OK.	

Explanation	Screenshot
18. The freight order has been send to the carrier, but the carrier has not responded yet. Choose Save to save the freight order.	
19. Typically, the carrier response is received electronically. However, you can also manually confirm on-behalf of the carrier, e.g. if the carrier calls you to confirm. Choose <i>Set to Confirmed by Carrier</i>.	
20. The confirmation status of the freight order has been changed to Confirmed. Choose Save to save the freight order. (This action concludes this demonstration.)
